**WARNING**

Many rides at Cedar Point are dynamic and thrilling. There are inherent risks in riding any amusement ride. For your protection, each ride is rated for its special features, such as high speeds, steep drops, sharp turns, or other dynamic forces. If you choose to ride, you accept all of these risks. Restrictions for guests of larger size (height or weight) are posted at certain rides. Guests with disabilities should refer to our Ride Admission Policy available at Guest Services or Town Hall. Participate responsibly. You should be in good health to ride safely. You know your physical conditions and limitations, Cedar Point does not. If you suspect your health could be at risk for any reason, or you could aggravate a pre-existing condition of any kind, DO NOT RIDE!

All passenger restraint systems, including lap bars, shoulder harnesses and seatbelts, must be positioned, fastened, and tightened properly to allow guests to ride.

---

*Information in this guide is subject to change.*

---

**Welcome to Cedar Point!**

We are glad you are here! At Cedar Point we are proud to have earned one of the best safety records in the industry. We are committed to providing our guests with a safe environment and we want our guests to have a safe and enjoyable day. We are continually striving to improve our facilities. If you have a suggestion for an improvement or have questions not answered in this brochure, please stop at Guest Services.

Many amusement park rides incorporate safety systems designed by the manufacturer to accommodate people of average physical stature and body proportion. These safety systems may place restrictions on the ability of an individual to safely experience the ride. Guests of larger or smaller size, guests who have a history of heart, back or neck trouble, pregnant women, people who have had recent surgery, or people with casts, braces, restrictive devices or disabilities may not be safely accommodated by these systems. For example, height requirements are based on the size needed for the safety restraints to function properly and the level of maturity usually associated with a certain height.

Cedar Point’s Ride Admission Policy has been developed in consultation with industry experts, based on the recommendations of the manufacturer, our past experience and our evaluation of each ride using our knowledge of the ride in both normal and emergency operating conditions. Our prime consideration is the ability of each person to endure the dynamics of a ride without risk of injury to that person or other riders.

If you feel that you or a member of your party may be affected by this policy, you are encouraged to visit Guest Services or Town Hall to obtain a list of rides you can safely ride. Your Rider Access Form will provide information for our ride operators to help accommodate you.
RIDE RATING SYSTEM

A Ride Rating Program has been designed which provides a scale for rating the thrill factor of each ride. The intent is to provide a scale to guide Park guests in determining which attractions to ride based on their own experience level, physical condition, and abilities.

Each ride/attraction is placed into one of five categories

<table>
<thead>
<tr>
<th>CATEGORY</th>
<th>DESCRIPTION</th>
</tr>
</thead>
<tbody>
<tr>
<td>Low Thrill Rides</td>
<td>Rides that are generally calm and gentle in nature.</td>
</tr>
<tr>
<td>Mild Thrill Rides</td>
<td>Rides that generally have low speeds with gentle motion and braking. Rides have smooth transitions with some changes in elevation and speed.</td>
</tr>
<tr>
<td>Moderate Thrill Rides</td>
<td>Rides that generally have low to medium speeds and/or heights with moderate motion and braking. Riders may encounter unexpected changes in direction and/or speed during portions of the ride.</td>
</tr>
<tr>
<td>High Thrill Rides</td>
<td>Rides that generally have medium to high speeds and/or heights with moderate to rapid braking. Riders may encounter unexpected changes in speed, direction and/or elevation.</td>
</tr>
<tr>
<td>Aggressive Thrill Rides</td>
<td>Rides that generally have one or more of the following: high speeds and/or heights, aggressive and unexpected forces, and rapid directional or elevation change. Riders will encounter many unexpected rapid changes in speed, direction and/or elevation.</td>
</tr>
</tbody>
</table>

KEY TO SYMBOLS

These symbols along with the ride ratings are used to define our rides on the following pages.

<table>
<thead>
<tr>
<th>Symbol</th>
<th>Description</th>

<td>Maximum Water Depth</td>
</tr>
<tr>
<td>Prohibited for guests with back trouble</td>
<td>Prohibited for guests who have had recent surgery</td>
</tr>
<tr>
<td>Prohibited for pregnant women</td>
<td>Prohibited for guests with heart trouble or high blood pressure</td>
</tr>
<tr>
<td>Prohibited for guests with neck trouble</td>
<td>Prohibited for guests who have had recent surgery</td>
</tr>
</tbody>
</table>
Please Ride Safely
Under the Ohio Revised Code Section 1711.551 riders must obey all warnings and directions regarding amusement park rides and behave in a manner that will not cause or contribute to injury to themselves or others. Failure to comply is a misdemeanor.

While all amusement attractions have associated risks, certain individuals are at increased risk for injury from these attractions. Carefully evaluate each attraction to determine if you or members of your party can safely participate. We reserve the right to deny access to a ride to anyone who we feel may not be able to safely experience the ride or may be a hazard to other riders.

A Rider Safety Guide sign is posted at every ride entrance and alternate access entrance. These signs provide height requirements, health restrictions, ride ratings, ride accessibility, and special instructions regarding the ride. Please review these signs prior to accessing the ride and ensure to follow all instructions provided.

In general, all riders should be in good health and free from any conditions known or unknown that might be aggravated by riding. If you have any doubt about your ability to safely experience a ride, we urge you to consult with our staff at Guest Services or Town Hall. Remember, if you suspect your health could be at risk for any reason, or you could aggravate a pre-existing condition of any kind, DO NOT RIDE.

Generally, guests must have the ability to brace themselves upright in the seat and support their head and neck during the ride movements. Riders using wheelchairs will have to transfer from their wheelchair to the ride unit by themselves or assisted by a member of their party in order to be able to ride. You should plan your visit with someone who can physically help you when necessary.

As a rider, you are responsible for your own safety. Please read this guide and all instructional signage before riding. Listen to and follow all operator instructions. Any person who intentionally removes a safety restraint, violates a park safety policy, or appears to be under the influence of alcohol or chemical intoxicants will be removed from the park without refund. FOR YOUR SAFETY, DO NOT ENTER AN UNAUTHORIZED AREA FOR ANY REASON. You may be seriously injured if you enter an unauthorized area.

Before riding, please note all safety warnings for each ride. In general:

- Face forward and remain seated in an upright position with your back and shoulders against the seat back and hold on until the ride comes to a complete stop.
- All passenger restraint systems, including lap bars, shoulder harnesses, and seat belts, must be positioned, fastened, and tightened at all times.
- Due to the nature of our rides, backpacks, purses, electronics, stuffed animals and other loose items are not permitted on most rides. Glasses must be secured. Smaller items may be secured in cargo pockets, waist packs, left in a locker or with a non-rider. Cedar Point is not responsible for lost or stolen items. You are responsible for your personal property.
- No picture taking, cell phone or electronic usage while riding.
- Keep all parts of your body inside the ride unit at all times.
- Shirt, shoes, and shorts/pants are required on most amusement park rides.
- Finish food and drink before boarding.
- Smoking, including e-cigarettes, is only permitted in designated smoking areas.

Alternate Access Entrances & Attraction Boarding Passes
Cedar Point’s Ride Admission Policy and Alternate Access Entrances are designed to help you safely experience our facilities and provide equal access to all guests.

The safety of guests and associates is our #1 priority at Cedar Point. Safety is a shared partnership between the park and our guests. Not everyone can safely enjoy every ride. Guests are asked to review
and carefully consider the ride restrictions using good judgment. However, we reserve the right to make the final decision regarding the eligibility of a rider based on a person's size, weight, willingness to ride, or other limitations. Please refer to your individual Rider Access Form for rides that will safely accommodate you.

If you require the use of an Alternate Access Entrance, please visit Guest Services or Town Hall to obtain a Rider Access Form, Boarding Pass, and Guest Assistance Guide. The Guest Assistance Guide explains the ride entry guidelines and procedures and provides specific information related to each attraction. Alternate Access Entrances are intended to accommodate guests with mobility restrictions or Autism Spectrum Disorder (ASD) and not to bypass others waiting in line. This service is available for a guest with restricted mobility or ASD and up to three companions.

To provide equal access for all guests, we have developed a Boarding Pass Program which allows guests with mobility restrictions or ASD to access rides at specified times via the Alternate Access Entrance (usually a ride's exit) in order to avoid crowds and waiting in the regular lines.

Guests who are in possession of a boarding pass will obtain a boarding or “ride” time on the boarding pass that is equal to the anticipated wait time for a particular ride from the ride associate at the alternate access entrance (usually a ride's exit). Guests can then choose to rest comfortably away from the queue area or visit a shop, see a show or play a game until their boarding time.

Information on where guests access the ride is posted on each Ride's Rider Safety Guide Sign. All guests, regardless of point of access, are required to meet all riding requirements for the ride, including height and medical restrictions in order to ride/participate.

**Here's How It Works**

- The guest with a mobility impairment or ASD should visit Guest Services or Town Hall upon his/her arrival at the park to express his/her inability to wait in the regular line. Some questions are asked to ensure that the rider has the required physical criteria in order to safely experience rides, and a Boarding Pass is issued for the guest in question and up to 3 riding companions.
- In addition to a Boarding Pass, the guest with a mobility impairment or ASD will receive a “Rider Access Form” that lists the rides that the guest with a disability can safely enjoy.
- The rider (or a member of their party) obtains a boarding time from the ride associate at the Alternate Access Entrance, equivalent to the length of the ride line. The rider can then wait comfortably away from the queue area.
- The guest listed on the Boarding Pass must be present as a rider when a Boarding Pass is being utilized.
- Guests may not accumulate more than one boarding time at a time.

Due to the nature of the attractions in Cedar Point Shores, Alternate Access and Boarding Passes are only available at Cedar Creek via the entrance/exit. Boarding Passes, however, are required for Halloween Mazes/Houses if the maze has a line.

**Additional Information and Services**

We are trying to make Cedar Point as enjoyable and barrier free as possible. Should you find that you need assistance at any point during your visit, please do not hesitate to ask any one of our associates. They will be happy to assist you in any way needed to make your visit more enjoyable.

Listed below are some of the services we offer. Please feel free to suggest areas in which we might improve in the future.

**Assisted Listening Devices**

Assistive listening systems utilize a lightweight wireless device that receives a signal from transmitters at certain locations in order to amplify sound. These are recommended for guests with mild to moderate hearing loss.

To use the system, obtain a receiver at Guest Services. This system is located in the following Live Entertainment venues: Camp Snoopy™ Theatre, Jack Aldrich Theatre, Red Garter Saloon and Lusty Lil’s Palace Theatre.
Braille & Large Print Guides
Braille guides of the Park Map & Guest Assistance Guide are available at Guest Services. There are a limited number of guides available on a first-come, first-served basis.

Campground & Hotel Shuttle Buses
A bus is available for transportation to and from park entrances, hotels, Cedar Point restaurants and Pet Chek. Available to Resort Guests only. Phones to call a Courtesy Shuttle are located at each stop. Courtesy Shuttle locations:

Hotel Breakers: Front Entrance
Lighthouse Point: Bench adjacent to the Registration Office and near Shuffleboard Court & Pool
Marina: Right of the Marina Building & Famous Dave's
Bay Harbor: Request a shuttle at the hostess stand
Cedar Point Shores: Right of the main entrance
Front Gate: In front of Season Pass Center

First Aid
Our two park First Aid Stations are staffed from park opening to park closing. The Cedar Point Shores First Aid Station is open during Cedar Point Shores Operating Hours. Refrigeration for medication, with the exception of bee sting anaphylaxis kits, is available at First Aid, and medical equipment can be stored.

Emergency medical care is available for overnight guests. One First Aid Station is located behind the Snoopy™ Boutique, just off the main midway. A 2nd is located in Frontiertown, near the entrance to Fountain & Floats. The Cedar Point Shores First Aid Station is located across from Crosscurrent.

Interpretive Services
With advance notice (at least 7 days), we can provide interpretive services for hearing impaired guests. Please direct inquiries to our Park Admissions department at 419-627-2309.

Live Show scripts are available at each show venue upon request and must be returned at the end of the show. Ride Spiel Cards are located at Guest Services.

Multi-Sensory & Calming Room
Located near Frontiertown First Aid, a Multi-Sensory Room is provided for those guest with sensory processing concerns. This dedicated space provides tools for family members or caregivers to intensify or reduce sensory stimulation in a controlled environment. For more information regarding the Multi-Sensory Room please call 419-627-2350 prior to your visit. When at the park, please stop by Guest Services or Town Hall for additional information.

Parking for Guests with Disabilities
Guests requiring handicap parking spaces should turn on hazard lights and ask a traffic director for the exact location. Permits are required to use these spaces.

Restrooms
Private restroom facilities for guests needing the assistance of another guest are available at Main First Aid, Camp Snoopy™, Lakeside Pavilion, FrontierTown First Aid, Matterhorn and Barnyard rest room on the Frontier Trail. Wheelchair accessible stalls are located at all restrooms.

Service Animals
Service animals are welcome at Cedar Point. A service animal is defined as a dog or miniature pony that has been individually trained to perform tasks for a person with disabilities. Service animals must be controlled with a restraining device and must display appropriate behavior at all times while on our property. There is a limit of one service animal per guest. A relief area is located across from Camp Snoopy on the Gemini Midway.

Due to the nature of most rides, service animals must remain with a non-riding member of your party. We are not permitted to take control of your service animal. Service animals may be taken on the Carrousels and the Cedar Point & Lake Erie Railroad. Service animals are not permitted in water attractions, wet decks, wading pools or lazy rivers. Guests may take advantage of our Parent Swap policy for staying with the service animal. Visit Guest Services or Town Hall for more information.
**Special Dietary Needs**
Although food and beverages are not allowed to be brought into the park, individuals who have special need/diet items due to a medical condition may bring small coolers to accommodate such needs.

**TTY Devices**
A TTY is available at Hotel Breakers for guests with hearing disabilities needing to use a telephone.

**Wheelchair, Scooter, Stroller & ECV Rental**
A limited supply of wheelchairs, electric convenience vehicles (ECV), and strollers are available for rent at Rental Center on the right just inside the front gate and at Joe Cool’s Corner Store (wheelchairs only) near the Resort Gate. However, since wheelchairs, ECV’s, and strollers are rented on a first-come, first-served basis and cannot be reserved in advance, we urge guests to bring their own. Quantities are limited. For those guests who choose to use a battery-powered vehicle or wheelchair, we require a safe speed be maintained while traveling in the park.

Wheelchairs, ECV’s, and strollers may not be taken out of the Park gates or to the parking lot. However, a park associate will be happy to provide any assistance you may need at that time. For any guest using a personal Segway, please stop by Guest Services. A wristband must be acquired at the Rental Center to be able to take the wheelchair and/or stroller out of the entrance gates to one of our resorts.

**Definitions**
Every ride entrance lists height requirements and special instructions regarding the ride. Cedar Point uses the following terms:

**Ability to hold on or brace:** Ability to use one’s arms to maintain a grasp on an assist bar and support one’s body during normal and emergency procedures on a ride and to use one’s legs to brace to maintain a seated position during the forces of the ride.

**Accompanied By:** Whenever a guest needs accompaniment, the accompanying person must meet all the ride requirements, as well as assist the guest. This includes helping the guests in the boarding and exiting of the ride, assisting the guest in maintaining postural control while riding, and assisting the guest down stairs, catwalks, or ladders in case of an evacuation.

**Full-Arm and Full-Leg Casts:** Any cast that prevents the arm from bending at the elbow or the leg from bending at the knee is considered a “full” cast.

**Hand-held Infant:** A hand-held infant is a child who is unable to walk to the ride unit independently or maintain independent seated postural control.

A hand held infant will only be able to ride the following rides as long as the infant has a supervising companion:

- Kiddy Kingdom Carrousel — must be seated with a supervising companion in a chariot.
- Midway Carrousel — must be seated with a supervising companion in a chariot.
- Cedar Point & Lake Erie Railroad — must be seated with a supervising companion in the center of the bench.
- Sky Ride
- Lakeslide Landing – pool only
- Lemmy’s Lagoon
- Cedar Creek
- Waterin’ Hole
- Breakwater Bay — water depth restricted to 2 feet or less and have a supervising companion.
- Marina Pool
- Hotel Breakers Indoor Pool (Towers)
- Hotel Breakers East Outdoor Pool
- Hotel Breakers Outdoor Kiddie Pool
- Lighthouse Point Resort Pool

**Supervising Companion:** Many of our rides have height requirements that allow a guest under that requirement to ride with a supervising companion. A supervising companion is someone who meets all the requirements to ride the ride themselves, is 14 years of age or older, and demonstrates appropriate observed behavior. The supervising companion must be seated in the same seat (row) as the guest who needs accompaniment and can accompany the number of riders for which the seat is designed. For example, if a seat is designed
for three people, the supervising companion can accompany two riders. An exception to this is at Peanuts™ Road Rally where the supervising companion does not have to be in the same row.

Evacuations
Evacuations may be required due to such causes as a mechanical problem, weather conditions, or a power interruption. If an evacuation is required, guests may need to maneuver across catwalks, from the highest point of the ride, and down steeply inclined catwalks or steps. Ride units may also stop at the top of lifts or on the ride course due to mechanical reasons. Certain evacuations may require guests to use additional safety equipment during the process. In Cedar Point Shores, guests may be asked to evacuate pools as quickly as possible using stairs or ladders. If an evacuation from a ride/attraction is required, for safety reasons, we may evacuate ambulatory guests prior to evacuating those guests using wheelchairs. If so, you accept any risk due to delayed evacuation if we need to physically lift or lower you. If your wheelchair can be safely accommodated on a ride, you are responsible for it being able to withstand the movement of the ride.

Guests Of Larger Size
All passenger restraint systems, including lap bars, shoulder harnesses, and seatbelts must be positioned and fastened properly to allow guests to ride. Due to rider restraint system requirements, guests of larger size (in terms of height, weight, and/or proportions) may not be accommodated on some of our rides.

Our larger guests may experience difficulty on: Blue Streak, Corkscrew, GateKeeper, Lake Erie Eagles, Maverick, maXair, Millennium Force, Mine Ride, Pipe Scream, Power Tower, Raptor, Rougarou, Skyhawk, SlingShot, Steel Vengeance, Top Thrill Dragster, Wave Swinger, Valravn, and Wicked Twister. Maximum and minimum recommended weight limits can be found under the individual rides in this guide and on the Rider Safety Guide Signs at the entrance to rides with restrictions.

If you are concerned whether or not you can be accommodated safely on a ride, you may enter the ride via the exit to ensure the restraints function properly prior to waiting in line. The rest of your party may wait for you outside the exit. Test seats are located at the ride entrance of: GateKeeper, Maverick, maXair, Millennium Force, Raptor, Rougarou, Skyhawk, Steel Vengeance, Top Thrill Dragster, Valravn and Wicked Twister.

The manufacturer requires a maximum rider height on the following rides:

- GateKeeper – 78″ (6’6″)
- Maverick – 78″ (6’6″)
- Millennium Force – 78″ (6’6″)
- Rougarou – 78″ (6’6″)
- SlingShot – 79″ (6’7″)
- Top Thrill Dragster – 78″ (6’6″)
- Wicked Twister – 78″ (6’6″)

Guests Using Wheelchairs
Wheelchairs and ECV’s cannot be accommodated on most rides and attractions, with the exception of C.P. & L.E. Railroad, where two wheelchairs can be accommodated. Please refer to the individual ride and attraction descriptions in the back of this brochure for more specific information.

On most rides where guests in wheelchairs can be accommodated, guests will need to leave their wheelchairs to be seated. In most cases, a wheelchair may be left in a designated position on or near the ride platform or walkway near the ride. Almost every ride is wheelchair accessible. Wheelchair Lifts are available to transport a guest in a Wheelchair and One Companion to our 2nd story ride platforms. Please use phone at base of lift to request service, (signal host at Wilderness Run). Wheelchair Lifts are available at Corkscrew, GateKeeper, Gemini, Iron Dragon, Wilderness Run, Magnum XL-200, Mine Ride, Pipe Scream, Raptor, Rougarou and Steel Vengeance. A standard elevator is available for self service at Maverick and Valravn. Please ask an associate at each location for assistance.

If in doubt about your ability to safely experience a ride, we urge you to consult with our staff at Guest
Services or Town Hall. Cedar Point personnel are not trained in transferring guests from wheelchairs to ride units and are not permitted to do so. You should plan your visit with someone who can physically help you when necessary.

Guests may re-charge their wheelchair battery at Guest Services.

**Health Restrictions**

Each ride is evaluated against 5 primary health restrictions. These restrictions are:
- Recent Surgery
- Heart Trouble/High Blood Pressure
- Neck Trouble
- Back Trouble
- Pregnancy

Guests with a history of recent surgery, heart trouble/high blood pressure, neck trouble, back trouble, or any other condition that may be aggravated by riding, or who are pregnant, are prohibited from riding most rides. If you are in doubt about your ability to safely experience a ride or would like more rider information, please stop by Guest Services or Town Hall or review the Safety Guides posted at each ride entrance and exit.

**Height Requirements**

Your child may be “officially” measured at Guest Services, Lost Persons or at Town Hall. The measured guest will be given a wristband to indicate their height range. Wristbands are not required to ride.

For the safety of your child, a standard play shoe which does not contribute excessively to the child’s height is required. For example: a child is not permitted to wear platform shoes to help meet a height requirement. Cedar Point reserves the right to ask that shoes be removed to ensure that a child’s height is not being artificially enhanced or manipulated.

Height measurements at Cedar Point Shores are taken in bare feet.

**Loose Articles**

When planning your day at Cedar Point, it's best to travel light. Bring only items that can be safely secured in cargo pockets (fastened with velcro, a button or zipper) or a waist pack fastened with a zipper. Most rides cannot accommodate loose articles including cell phones, pagers, hats, cameras, stuffed animals, purses, backpacks, basketballs, umbrellas, beverage containers, personal entertainment devices, etc. Items must be safely secured in cargo pockets, a waist pack, in a bin on the ride platform, left in a locker, or with a non-rider. Ride Operators cannot be responsible for these items. GateKeeper, Magnum XL-200, Millennium Force, Rougarou, Top Thrill Dragster and Valravn: Loose items that are not able to be stored in waist packs or cargo pockets are not permitted in line. Loose items that are not able to be stored in cargo pockets are not permitted in line at Steel Vengeance. Glasses must be secured on all rides; on GateKeeper, Maverick, maXair, Power Tower, Professor Delbert’s Frontier Fling, Skyhawk, SlingShot, Steel Vengeance, Top Thrill Dragster, Valravn, and Wicked Twister glasses must be secured by an athletic strap or they cannot be worn on the ride. For safety reasons, taking pictures, videotaping and filming on rides is prohibited.

**Lost Articles**

Secure all loose articles such as glasses, cellular phones, electronic devices, loose change, cameras, keys, clothing, sunglasses, hats, wallets, etc., before you board a ride. All items found at Cedar Point are turned in to our Lost and Found Department at our main gate. If you lose an item on a ride, we will search for the article as soon as possible. In order to keep the ride in operation an immediate search may not be possible.

To report a Lost Item: On your Mobile Device and By Computer: Visit www.cedarpoint.com and select “Lost and Found” under “Help”. You may also report items using our guest courtesy computers in Guest Services and the Season Pass Center. You will receive an email confirmation once your Lost Item Report has been submitted. Once we have located your item, we will contact you by email to arrange its return.
FOR YOUR SAFETY, DO NOT ENTER UNAUTHORIZED AREAS TO RETRIEVE LOST ARTICLES. You may be seriously injured if you enter an unauthorized area.

Magnetic Fields On Rides
Magnetics are used at the following attractions: GateKeeper, Maverick, Millennium Force, Rougarou, Snake River Falls, Steel Vengeance, Top Thrill Dragster, Valravn, and Wicked Twister. Guests with medical devices sensitive to magnetic fields (pacemakers, hearing aids, etc.), should consider these factors when deciding to ride.

Oxygen Tanks
Due to the dynamic nature of rides, oxygen tanks are not permitted on most attractions. Please consult with Guest Services or Town Hall to speak with a member of management to discuss available rides. Oxygen tanks are permitted in all restaurants, shops and entertainment venues.

Photosensitivity/Strobe Lighting
Many attractions utilize special effects including strobe lighting and specialty ride lights that may impact guests with certain medical conditions. Attractions utilizing these effects include; GateKeeper, Magnum XL-200, Maverick, maXair, Millennium Force, Raptor, Rougarou, Steel Vengeance, Top Thrill Dragster, Valravn, WindSeeker, and Woodstock™ Express.

Pregnancy
Pregnant women are prohibited from riding all rides with the exception of CP & LE Railroad, Lake Erie Eagles, Giant Wheel, Kiddy Kingdom, Midway Carrousels and Sky Ride.

Proper Attire
Most rides require proper riding attire including shirts and shoes. Shirts and shoes are required in queues and all park pathways at all times. Swimwear is only permitted on Snake River Falls and Thunder Canyon. For your safety, loose clothing (including scarves and other free-flowing clothing), must be significantly secured or removed to prevent any interference with the ride system. In Cedar Point Shores, appropriate swim wear is required. Thongs and transparent closing are not permitted. We reserve the right to determine appropriateness of swim wear. Swim diapers are required.

Prosthetic Devices
Guests with any type of prosthesis should not ride unless they can ensure the device is properly secured and will remain in place during the ride. All riders must be able to maintain the proper riding positioning. Additionally, prosthetic devices with exposed metal parts are not permitted on most Cedar Point Shores attractions. Guests should visit Guest Services or Town Hall prior to waiting in line or riding to ensure a safe riding experience.

Prosthetics are NOT allowed on the following:
- GateKeeper
- maXair (leg prosthesis only)
- Raptor
- Rougarou
- Steel Vengeance
- Valravn
- WindSeeker (a rider with more than one lower body prosthesis is not allowed)

The manufacturers of the following rides require that guests with prosthetic devices provide Cedar Point with documentation from the provider of their prosthetic device to guarantee that the device has been designed to remain securely in place while exceeding a maximum speed of 120 miles per hour with maximum G forces from -1.5 G’s to 5G’s with a sufficient safety factor for single point failure items:
- Maverick
- Millennium Force
- Top Thrill Dragster
- Wicked Twister

Guests who do not have documentation — in order to ride — must remove their prosthetic and have a below the knee amputation and sufficient lower extremities to ensure the ride restraint system adequately restrains them on the following:
- Maverick
- Millennium Force
- Top Thrill Dragster
Guests with prosthetics enjoying their day at Cedar Point Shores should consult with a member of our Aquatics Supervisory team.

**Ride Devices for Guest with Disabilities**
Transfer devices, when requested, can be used to assist a rider out of a wheelchair and into a ride unit. The following rides are equipped with a transfer device: Blue Streak, Corkscrew, Gemini, Iron Dragon, Magnum XL-200, Mine Ride and Woodstock Express.

Body Harnesses, when requested; allow certain riders with disabilities the ability to ride if they meet the ride criteria. The following rides are equipped with a body harness: GateKeeper, Raptor, Rougarou, and Valravn.

Hand controls, when requested, can be used to assist a rider in operating a vehicle if unable to use the gas pedal. The following rides are equipped with hand controls: Antique Cars and Cadillac Cars.

In addition, specific ride vehicles are equipped with removable sides at Pipe Scream and Steel Vengeance. These vehicles may further assist guests in transferring from their wheelchair to the ride unit. Please inform an associate at the ride if you wish to use that vehicle.

Please see an associate at each ride, Guest Services, or Town Hall for assistance.

**Rider Criteria**
Cedar Point’s Ride Admission Policy is designed to allow our riders to participate in the enjoyment of our park as much as possible. The policy was developed by analyzing the Neutral Criteria required to safely ride each particular ride. Each ride was evaluated for the criteria necessary for an individual to ride safely. It is our policy to allow anyone to ride who meets all these requirements and is not a hazard to himself or others. We continue to evaluate and update our Ride Admission Policy as necessary.

The evaluation of each ride considered the following criteria which may be required to ride a particular ride safely.

1. **Ability to exhibit independent seated postural control under the dynamic conditions of the ride.**
   *Explanation: The rider must have the body and spinal control to sit upright without the aid of other people or devices. The rider must also have sufficient muscle control to support their head, neck and upper torso during the course of the ride, including the dynamic motion of the ride. Certain ride units such as carousel horses require the ability to form a saddle posture with the rider’s thighs.*

2. **Appropriate center of gravity.**
   *Explanation: The rider’s body must have the appropriate weight distribution for that ride.*

3. **Ability to hold on with one functioning arm.**
   *Explanation: A functioning arm is an upper extremity or prosthesis exhibiting good grip control, the ability to brace, and strong enough to allow the rider to maintain the proper riding position throughout the duration of the ride. Any arm prosthesis must remain properly secured under the dynamic forces of the ride. Due to manufacturer requirements, some rides may exclude prosthetics.*

4. **Ability to hold on with two functioning arms.**
   *Explanation: Ability to hold on with two functioning arms as defined above.*

5. **Ability to brace self with one functioning leg.**
   *Explanation: The rider must have one functioning leg to be used for bracing the body during the course of the ride. A functioning leg may be a normal leg or a prosthesis, (see page 8 Prosthetic Devices) which can be used for bracing and maintaining balance when entering and exiting a ride unit. Any leg prosthesis must remain properly secured under the dynamic forces of the ride. Due to manufacturer requirements, some rides may exclude prosthetics.*

6. **Ability to brace self with two functioning legs.**
   *Explanation: Riders must have two functioning legs to be used for bracing the body during the course of the ride and maintaining balance when entering and exiting a ride unit. A functioning leg may
be a normal leg or a prosthesis (see page 8 for Prosthetic Devices) which can be used for bracing.

7. Minimum of two functioning extremities.
Explanation: Riders must have a minimum of two functioning extremities (two legs, two arms, or one arm and one leg) to brace themselves during the ride and assist in entering and exiting the ride unit.

8. Minimum of three functioning extremities.
Explanation: Riders must have a minimum of three functioning extremities (two legs and an arm or two arms and one leg) to brace themselves (with tripod bracing) during the ride.

9. Ability to enter/exit the attraction within specified parameters without endangering self or others.
Explanation: Riders must be able to enter and exit the ride without jeopardizing themselves or others and to assist with their own evacuation, if necessary. This may include special arrangements such as entering through the exit or having someone aid you in boarding. For the safety of our team members and riders, ride operators are instructed not to perform any lifting of riders, other than in the children’s area.

10. Appropriate Observed Behavior:
Explanation: Rider demonstrates appropriate observed behavior indicating a willingness and ability to participate and/or follow rider requirements. Appropriate observed behavior may include, but not be limited to maintaining proper riding position, attention and compliance to safety instructions, proper use of all ride safety equipment and willingness to participate.

Riders have a duty to:
• exercise good judgment
• act in a responsible manner while using amusement rides
• obey all warnings prior and during participation
• not participate while under the influence of alcohol or drugs
• properly use all ride safety equipment provided

**Notes:**
- **Y** – May ride with the condition
- **C** – Must ride in a chariot
- **F** – Cast/Brace must fit comfortably in the ride unit
- **O** – Not Permitted to participate on elevated activity area
- **Z** – Participation or water depth may be restricted if necessary
Access Symbols
Symbols indicate boarding procedures for each ride and are defined below.

Ambulatory
This symbol is used to identify rides where guests must be able to walk independently or be assisted by a member of their party.

Transferable
Rides using this symbol can accommodate guests who are able to transfer from the wheelchair to the ride unit by themselves or assisted by a member of their party. Guest must be accompanied by a companion who can assist with transfer, as Cedar Point associates are not permitted to physically assist guests with transferring from their wheelchairs.

Wheelchair Accessible
This symbol is used to identify rides where the guest may remain in wheelchair. This ride includes Cedar Point & Lake Erie Railroad.

RIDES
The following descriptions are designed to give you information on the type of actions caused by various rides. Each of the following attractions will identify the restrictions according to the criteria itemized above. In order to participate on attractions, guests must have seated postural control, appropriate center of gravity, appropriate observed behavior, and the ability to enter and exit the ride safely.
Specific exceptions or qualifications to those four criteria will be noted in the information provided below. If you have been authorized for Alternate Access, follow the directions listed under each ride.

Antique Cars
Guests must be a minimum of 48” tall to ride alone OR be accompanied by a Supervising Companion. Hand held infants are not permitted.
Antique styled gas-powered car that is driven by the rider on a designated track for up to four riders per car.

Restraint System: A shared seatbelt secures all riders in the row across the thighs and pelvis.

Rider Criteria: Guests who are not able to steer and press the accelerator must have another rider to accompany them to drive.

Guests with a cervical collar or neck brace are not permitted to ride.

Guests with a visual impairment must ride with another rider who meets the requirements to drive.

Rider Access: Alternate access is available at the ride exit. Riders will have to take several steps, on their own or with the assistance of a companion, and be capable of stepping up and into the seat of the car.

Please remember that inattentive drivers may bump you from behind. To avoid injury, please use caution while riding and while entering and exiting the ride.
Blue Streak

Guests must be 48” tall to ride.

A high speed wooden roller coaster with a combination of banked turns and airtime humps.

Restraint System: An individual lap bar and seatbelt secures each rider across the thighs and pelvis.

Due to the nature of the restraint, this ride may not accommodate guests of a larger size.

Rider Criteria: Guests must have a minimum of three functioning extremities.

Guests with a cervical collar, neck brace, broken collar bone, full arm cast, braced arm cast, or full leg cast are not permitted to ride.

Rider Access: Alternate access is available at the ride exit. Riders will have to transfer into the seat, on their own or with the assistance of a companion. A transfer device is available upon request which may assist a rider out of a wheelchair and into the ride unit.

Please do not use the ride restraints for support while entering and exiting, as they will shift.

Cadillac Cars

Guests must be a minimum of 48” tall to ride alone OR be accompanied by a Supervising Companion. Hand held infants are not permitted.

An antique styled gas-powered car that is driven by the rider on a designated track for up to four riders per car.

Restraint System: A shared seatbelt secures all riders in the row across the thighs and pelvis.

Rider Criteria: Guests who are not able to steer and press the accelerator must have another rider to accompany them to drive.

Guests with a cervical collar or neck brace are not permitted to ride.

Guests with a visual impairment must ride with another rider who meets the requirements to drive.

CAMP SNOOPY™

Balloon Race

Guests must be 42” tall to ride alone OR be accompanied by a supervising companion. Hand held infants are not permitted.

Maximum Weight – 300 lb per car.

This ride only accommodates one rider over 54” per balloon.

PEANUTS™ themed hot air balloon ride that spins and raises riders in the air.

Restraint System: An individual seatbelt secures each rider across the thighs and pelvis. A door further encloses the ride unit.

Rider Criteria: Guests must have a minimum of three functioning extremities.

Guests with a cervical collar, neck brace, or broken collar bone are not permitted to ride.

Rider Access: Alternate access is mainstreamed via the ride entrance. Riders will have to transfer into the seat, on their own or with the assistance of a companion.

Please use caution, as the ride unit may shift when entering and exiting.

Camp Bus

Guests must be 42” tall to ride alone OR be accompanied by a supervising companion. Hand held infants are not permitted.

Maximum weight – 440 lb. per row

This ride only accommodates one adult per row.
PEANUTS™ themed bus with six rows that seats four guests per row. The bus rotates in a clockwise direction reaching a height of over 20 feet.

**Restraint System:** A shared lap bar secures all riders in the row across the thighs and pelvis. A door further encloses the ride unit.

**Rider Criteria:** Guests must have a minimum of two functioning extremities; one functioning arm (excluding prosthesis) and one functioning leg.

Guests must demonstrate appropriate observed behavior or ride with a supervising companion.

Guests with a cervical collar or neck brace not permitted to ride.

**Rider Access:** Alternate access is mainstreamed via the ride entrance. Riders will have to transfer into the seat on their own or with the assistance of a companion.

**Charlie Brown’s™ Wind Up**

Guests must be 42” tall to ride alone OR be accompanied by a supervising companion. Hand held infants are not permitted.

**Restraint System:** A shared lap bar and a between-the-leg safety belt secures each rider.

**Rider Criteria:** Guests must have a minimum of three functioning extremities.

Two functioning arms are sufficient instead of three functioning extremities if the guest has a normal center of gravity and lower extremities are sufficiently strong to maintain proper riding posture under the dynamic conditions of the ride. Amputations must be at the knee or below.

PEANUTS™ themed chair swing children’s ride with free hanging seats suspended from an elevated, rotating, and slanting tower. Riders will rotate in a circular motion as the tower begins to rise.

**Restraint System:** A shared lap bar secures all riders in the row across the thighs and pelvis.

**Rider Criteria:** Guests must have a minimum of two functioning extremities; one functioning arm (excluding prosthesis) and one functioning leg.

Guests with a cervical collar, neck brace, broken collar bone, full arm cast, or braced arm cast are not permitted to ride.

**Rider Access:** Alternate access is mainstreamed via the ride entrance. Riders will have to take several steps, on their own or with the assistance of a companion, and be capable of stepping up and over the side of the ride unit.

**PEANUTS™ 500**

Guests must be 42” tall to ride alone OR be accompanied by a supervising companion. Hand held infants are not permitted.

**Restraint System:** A shared seatbelt secures all riders in the row across the thighs and pelvis.

**Rider Criteria:** Guests must have a minimum of two functioning extremities; one functioning arm (excluding prosthesis) and one functioning leg.

Guests with a cervical collar, neck brace, full arm cast, braced arm cast, or full leg cast are not permitted to ride.

**Rider Access:** Alternate access is mainstreamed via the ride entrance. Riders will have to take several steps, on their own or with the assistance of a companion, and be capable of elevating themselves up into a suspended seat. Please use caution, as the ride unit may shift when entering and exiting.

**Red Baron™**

Guests must be between 36” and 54” tall to ride.

PEANUTS™ themed children’s plane ride that goes up and down as the ride rotates around in a circle. Riders can use a joystick to control the elevation of their unit.
Restraint System: An individual seatbelt secures each rider across the thighs and pelvis.

Rider Criteria: Guests must have a minimum of two functioning extremities; one functioning arm and one functioning leg.

Guests with a cervical collar, neck brace, or full leg cast are not permitted to ride.

Rider Access: Alternate access is mainstreamed via the ride entrance. Riders will have to take several steps, on their own or with the assistance of a companion, and be capable of stepping up and over the side of the ride unit.

Snoopy™ Bounce

Guests must be between 36” and 54” tall in bare feet to jump.

An air filled mattress located inside a large inflated Snoopy.

Rider Criteria: Guests with a cervical collar, neck brace, braced arm cast, full arm cast, or full leg cast are not permitted to ride.

Rider Access: Alternate access is mainstreamed via the ride entrance.

Tilt-A-Whirl

Guests must be 46” tall to ride alone OR be accompanied by a supervising companion. Guests less than 6 years old must be accompanied by a supervising companion. Hand held infants are not permitted.

Maximum Weight – 800 lb. per car.

This is a circular ride where cars pivot by centrifugal force created by the ride's rotating table.

Restraint System: A shared lap bar secures all riders in the row across the thighs and pelvis.

Rider Criteria: Guests must have a minimum of three functioning extremities.

Two functioning arms are sufficient instead of three functioning extremities if the guest has a normal center of gravity and lower extremities are sufficiently strong to maintain proper riding posture under the dynamic conditions of the ride. Amputations must be at the knee or below.

Guests must demonstrate appropriate observed behavior or ride with a supervising companion.

Guests with a cervical collar, neck brace, broken collar bone, or braced arm cast are not permitted to ride.

Rider Access: Alternate access is mainstreamed via the ride entrance. Riders will have to take several steps, on their own or with the assistance of a companion, and be capable of stepping up and over the side of the ride unit.

Please do not use the ride restraints for support while entering and exiting, as they will shift.

Wilderness Run

Guests must be 36” tall to ride alone. Guests over 54” tall must be accompanied by a child.

This ride only accommodates one rider over 54” per car.

A junior steel rollercoaster with mild drops, bumps, and turns.

Restraint System: A shared lap bar is positioned above the laps of all riders in the row. An individual seatbelt secures each rider across the thighs and pelvis.

Rider Criteria: Guests must have a minimum of three functioning extremities.

Guests with a cervical collar, neck brace, broken collar bone, full arm cast, or braced arm cast are not permitted to ride.

Rider Access: Alternate access is available at the ride exit. Riders will have to take several steps, on their own or with the assistance of a companion, and be capable of stepping up and over the side of the ride unit.

Please do not use the ride restraints for support while entering and exiting, as they will shift.
A wheelchair lift is available to transport guests from the Exit to the ride platform. Please signal the host at the exit to request assistance. Limit one rider in wheelchair and one companion in lift at a time.

**WARNING:** This ride contains strobe lighting.

**Woodstock’s™ Airmail**

Guests must be between 36” and 54” tall to ride.

*Maximum Weight – 400 lb. per ride.*

PEANUTS™ themed children’s ride that hoists riders up in the air and provides a gentle yet bouncy trip down.

**Restraint System:** A shared lap bar is positioned above the laps of all riders in the row. An individual seatbelt secures each rider across the thighs and pelvis.

**Rider Criteria:** Guests must have a minimum of three functioning extremities; one functioning arm and two functioning legs.

Two functioning arms are sufficient instead of three functioning extremities if the guest has a normal center of gravity and the lower extremities are sufficiently strong to maintain proper riding posture under the dynamic conditions of the ride. Amputations must be at the knee or below.

Guests with a cervical collar, neck brace, broken collarbone, braced arm cast, or full leg cast are not permitted to ride.

**Rider Access:** Alternate access is available at the ride exit. Riders will have to take several steps, on their own or with the assistance of a companion, and be capable of elevating themselves up into the seat.

Please do not use the ride restraints for support while entering and exiting, as they will shift.

**WOODSTOCK™ Express**

Guests must be 48” tall to ride alone OR 36” tall and accompanied by a supervising companion.

*Maximum Weight – 300 lb. per car.*

A PEANUTS™ themed junior steel rollercoaster with mild drops, bumps, and turns.

**Restraint System:** A shared lap bar is positioned above the laps of all riders in the row. An individual seatbelt secures each rider across the thighs and pelvis.

Due to the nature of the restraint, this ride may not accommodate guests of a larger size.

**Rider Criteria:** Guests must have a minimum of three functioning extremities.

Guests with a cervical collar, neck brace, broken collarbone, full arm cast, or braced arm cast are not permitted to ride.

**Rider Access:** Alternate access is available at the ride exit. Riders will have to transfer into the seat, on their own or with the assistance of a companion. A transfer device is available upon request, which may assist a rider out of a wheelchair and into the ride unit.

Please do not use the ride restraints for support while entering and exiting, as they will shift.

**WARNING:** This ride contains strobe lighting.

**Cedar Downs Racing Derby**

Guests must be 48” tall to ride.

A high speed circular ride somewhat resembling a carrousel. It generates a high level of centrifugal force due to the speed and size of the ride table.

**Restraint System:** Guests must have the ability to straddle the ride unit, hold onto the horse, and grip the horse with both legs.
Rider Criteria: Guests must have a minimum of three functioning extremities; one functioning arm and two functioning legs. Guests with a cervical collar, neck brace, broken collar bone, braced arm cast, or full leg cast are not permitted to ride.

Rider Access: Alternate access is available at the ride exit. Riders will have to take several steps, on their own or with the assistance of a companion, and be capable of elevating themselves up onto a horse.

Cedar Point & Lake Erie Railroad

Guests must be a minimum of 46" tall to ride alone OR be accompanied by a Supervising Companion. Guests less than 46” tall must sit in the center of the bench, not on the outside edge.

Authentic coal-fired steam engine that transports passengers along a circle track in the back section of the park. There are two stations, Main Station located near Iron Dragon and Frontier Station located near Maverick.

Rider Criteria: Riders must be able to demonstrate seated postural control and appropriate observed behavior or ride with a supervising companion.

Rider Access: Alternate Access is to the right of the turnstile at Main Station and in center of station at Frontier Station. Riders must be capable of stepping up onto the train. Wheelchairs can be folded and loaded on the train.

A special car and ramp are available for those unable to board without leaving their wheelchair.

Corkscrew

Guests must be 48” tall to ride.

A high-speed, looping roller coaster which turns riders upside down three times. Riders will experience weightlessness and rapid movements from side to side.

Restraint System: A shoulder harness with a between-the-legs safety belt secures each rider over the head and across the chest.

Due to the nature of the restraint, this ride may not accommodate guests of a larger size.

Rider Criteria: Guests must have a minimum of two functioning extremities; one functioning arm and one functioning leg.

Two functioning arms are sufficient instead of one functioning arm and one functioning leg if the guest is able to form a saddle posture with leg remnants sufficient to brace self upright in the seat.

Guests must have sufficient lower extremities to ensure the ride restraint system adequately restrains them.

Guests with a cervical collar, neck brace, broken collar bone, full arm cast, braced arm cast, or full leg cast are not permitted to ride.

It is recommended that earrings be removed prior to riding.

Rider Access: Alternate access is available at the ride exit. Riders will have to transfer into the seat, on their own or with the assistance of a companion. A transfer device is available upon request which may assist a rider out of a wheelchair and into the ride unit.

Please do not use the ride restraints for support while entering and exiting, as they will shift.

A wheelchair lift is available to transport guests from the Entrance to the ride platform. Please use the phone at the base of the lift to request assistance. Limit one rider in wheelchair and one companion in lift at a time.

Dodgem

Guests must be 48” tall to ride alone OR 42” tall and accompanied by a supervising companion.

A bumper car ride where guests drive their own cars. Riders will experience strong side-to-side movement and rapidly changing direction and forces.
Restraint System: A shared lap bar secures all riders across the thighs and pelvis.

Rider Criteria: Guests must have a minimum of three functioning extremities.

Guests with a cervical collar, neck brace, broken collar bone, or braced arm cast are not permitted to ride.

Guests with a visual impairment must ride as a passenger with a driver who meets the requirements to drive.

Guests who are not able to steer and press the accelerator must have another rider to accompany them to drive.

Rider Access: Alternate access is available at the gate to the left of the entrance. Riders will have to take several steps, on their own or with the assistance of a companion, and be capable of stepping up and over the side of the ride unit.

Please use caution, as the ride unit may shift when entering and exiting.

Avoid head-on collisions.

GateKeeper

Guests must be between 52" and 78" tall to ride.

A high-speed, wing looping roller coaster which turns riders upside down six times. Riders will experience weightlessness and rapid movements from side to side.

Restraint System: A shoulder harness with a between-the-legs safety belt secures each rider over the head and across the chest.

Due to the nature of the restraint, this ride may not accommodate guests of a larger size. A test seat is located at the ride entrance which can be used to evaluate proper fit and comfort prior to waiting in line.

Rider Criteria: Guests must have a minimum of three functioning extremities.

Two functioning arms are sufficient instead of three functioning extremities if the guest has a normal center of gravity and lower extremities are sufficiently strong to maintain proper riding posture under the dynamic conditions of the ride. Amputations must be at the knee or below.

Guests with a cervical collar, neck brace, or broken collar bone not permitted to ride. Casts are not permitted on this ride.

Prosthetics are not permitted on this ride. Guests should check with Guest Services or Town Hall to determine if they are eligible to ride without the prosthetic. Alternatively, guests with certain amputations may be able to ride with the use of a separate full body harness provided the guest has remaining leg and arm remnants to be secured by the harness. Guests should check with Guest Services or Town Hall to determine if they are eligible to ride using the full body harness.

Rider Access: Alternate access is available at the ride exit. Riders will have to take several steps, on their own or with the assistance of a companion, and be capable of elevating themselves up into the seat.

Please do not use the ride restraints for support while entering and exiting, as they will shift.

A wheelchair lift is available to transport guests from the exit area to the ride platform. Please use the phone at the base of the lift to request assistance. Limit one rider in wheelchair and one companion in lift at a time.

Note: Glasses may only be worn on this attraction if they are secured with an athletic strap. Glasses may not be held in the hands of riders while riding.

Loose articles may not be left on the platform. They may either be left with a non-rider or be placed in lockers for storage.

WARNING: This ride utilizes magnetic systems during the ride.

WARNING: This ride contains strobe lighting.

Gemini

Guests must be 48" tall to ride.

A high-speed roller coaster with a combination of high speed banked turns, airtime humps, and rapid directional changes.
**Restraint System:** An individual lap bar and seatbelt secures each rider across the thighs and pelvis.

Due to the nature of the restraint, this ride may not accommodate guests of a larger size.

**Rider Criteria:** Guests must have a minimum of three functioning extremities.

Guests with a cervical collar, neck brace, broken collar bone, full arm cast, braced arm cast, or full leg cast are not permitted to ride.

**Rider Access:** Alternate access is available at the ride exit. Riders will have to transfer into the seat, on their own or with the assistance of a companion. A transfer device is available upon request which may assist a rider out of a wheelchair and into the ride unit.

Please do not use the ride restraints for support while entering and exiting, as they will shift.

**Giant Wheel**

*Guests must be 48” tall to ride alone OR be accompanied by a supervising companion. Hand held infants and single riders are not permitted.*

A 145 foot tall ferris wheel. Riders ride in one of 36 gondolas suspended from the outer rim of the wheel.

**Restraint System:** A shared seatbelt secures all riders in the row across the thighs and pelvis. A door further encloses the ride unit.

**Rider Criteria:** Guests must have sufficient lower extremities to ensure the ride restraint system adequately restrains them.

Riders must be able to demonstrate seated postural control and appropriate observed behavior or ride with a supervising companion.

**Rider Access:** Alternate access is available at the ride exit. Riders will have to transfer into the seat, on their own or with the assistance of a companion. A specific cabin at this attraction is equipped with a larger door which may assist a rider in transferring from their wheelchair to the ride unit. Please inform an associate if you wish to use that vehicle.

Please use caution, as the ride unit may shift when entering and exiting.

**Iron Dragon**

*Guests must be 48” tall to ride.*

A suspended roller coaster with cars that hang down from the track and swing out to the sides as the ride drops and turns.

**Restraint System:** A shoulder harness secures each rider over the head and across the chest.

Due to the nature of the restraint, this ride may not accommodate guests of a larger size.

**Rider Criteria:** Guests must have a minimum of two functioning extremities; one functioning arm and one functioning leg.

Two functioning arms are sufficient instead of one functioning arm and one functioning leg if the guest is able to form a saddle posture with leg remnants sufficient to brace self upright in the seat against the shoulder harness.

Guests with a cervical collar, neck brace, broken collar bone, full arm cast, braced arm cast, or full leg cast are not permitted to ride.

**Rider Access:** Alternate access is available at the ride exit. Riders will have to transfer into the seat, on their own or with the assistance of a companion. A transfer device is available upon request which may assist a rider out of a wheelchair and into the ride unit.

Please use caution, as the ride unit may shift when entering and exiting.

Please do not use the ride restraints for support while entering and exiting, as they will shift.
A wheelchair lift is available to transport guests from the Entrance to the ride platform. Please use the phone at the base of the lift to request assistance. Limit one rider in wheelchair and one companion in lift at a time.

### KIDDY KINGDOM

#### 4 x 4's

*Guests must be under 54” tall to ride. Guests over 54” tall must be accompanied by a child. Hand held infants are not permitted.*

This ride only accommodates one rider over 54” per car.

This ride is a miniature truck ride that follows an electric track.

**Restraint System:** An individual seatbelt secures each rider across the thighs and pelvis.

**Rider Criteria:** Guests must have a minimum of two functioning extremities; one functioning arm and one functioning leg.

**Rider Access:** Alternate access is available at the ride exit. Riders will have to take several steps, on their own or with the assistance of a companion, and be capable of stepping up and over the side of the ride unit.

#### Dune Buggies, Mustangs, Police Cars

*Guests must be under 54” tall to ride. Hand held infants are not permitted.*

A kiddie circular ride with (dune buggy, mustang, or police car ride units)

**Restraint System:** An individual seatbelt secures each rider across the thighs and pelvis.

**Rider Criteria:** Guests must have a minimum of three functioning extremities.

**Rider Access:** Alternate access is mainstreamed via the ride entrance. Riders will have to take several steps, on their own or with the assistance of a companion, and be capable of stepping up and over the side of the ride unit.

#### Helicopters

*Guests must be under 54” tall to ride. Hand held infants are not permitted.*

A kiddie helicopter ride where riders control the elevation of each unit.

**Restraint System:** An individual seatbelt secures each rider across the thighs and pelvis.

**Rider Criteria:** Guests must have a minimum of three functioning extremities.

**Rider Access:** Alternate access is available at the ride exit. Riders will have to take several steps, on their own or with the assistance of a companion, and be capable of stepping up and over the side of the ride unit.

Please do not use the ride restraints for support while entering and exiting, as they will shift.

#### Kiddy Kingdom Carrousel

*Guests must be 46” tall to ride alone OR accompanied by a supervising companion. Hand held infants must ride in a chariot with a supervising companion.*

Antique Carousel that also has chariot seating available. The outer and inner most rows of animals are stationary while the middle rows move up and down.

Children under 46” must be seated in a chariot or on the middle row of animals and be held by a supervising companion who is standing on the platform between animals.

**Rider Criteria:** Riders must have the ability to straddle the ride unit. Riders unable to straddle the ride unit must be seated in a chariot unit.
Riders who do not have independent seated postural control, an appropriate center of gravity, ability to hold on with one functioning arm, or appropriate observed behavior, must ride in a chariot with a supervising companion.

Riders with a full leg cast must be seated in a chariot.

**Rider Access:** Alternate access is mainstreamed at the ride entrance. Riders will have to take several steps, on their own or with the assistance of a companion, and be capable of stepping up onto a platform.

**Motorcycles**

![Motorcycle Icon](image)

Guests must be between 39” and 54” tall to ride. Both feet must simultaneously touch the floor.

A kiddie circular ride with motorcycle ride units.

**Restraint System:** An individual seatbelt secures each rider across the thighs and pelvis.

**Rider Criteria:** Guests must have a minimum of three functioning extremities.

Full leg casts are not permitted on this ride.

**Rider Access:** Alternate access is mainstreamed via the ride entrance. Riders will have to take several steps, on their own or with the assistance of a companion, and be capable of stepping up and over the side of the ride unit.

**Rock, Spin & Turn**

![Rock, Spin Icon](image)

Guests must be under 54” tall to ride. Hand held infants are not permitted.

A kiddie tea cup spinning ride.

**Restraint System:** An individual seatbelt secures each rider across the thighs and pelvis.

**Rider Criteria:** Guests must have a minimum of three functioning extremities.

**Rider Access:** Alternate access is mainstreamed via the ride entrance. Riders will have to take several steps, on their own or with the assistance of a companion, and be capable of stepping up and over the side of the ride unit.

Please do not use the ride restraints for support while entering and exiting, as they will shift.
Sky Fighters

Guests must be under 54” tall to ride. Hand held infants are not permitted.

Maximum Weight – 100 lb per jet.

A kiddie ride with jets that rise in the air.

Restraint System: An individual seatbelt secures each rider across the thighs and pelvis.

Rider Criteria: Guests must have a minimum of three functioning extremities.

Rider Access: Alternate access is mainstreamed via the ride entrance. Riders will have to take several steps, on their own or with the assistance of a companion, and be capable of stepping up and over the side of the ride unit.

Space Age

Guests must be under 54” tall to ride. Hand held infants are not permitted.

A kiddie circular ride with spaceship ride units.

Restraint System: An individual seatbelt secures each rider across the thighs and pelvis.

Rider Criteria: Guests must have a minimum of three functioning extremities.

Rider Access: Alternate access is mainstreamed via the ride entrance. Riders will have to take several steps, on their own or with the assistance of a companion, and be capable of stepping up and over the side of the ride unit.

Magnum XL-200

Guests must be 48” tall to ride

A high speed steel roller coaster, featuring steep drops, dips, and turns at speeds over 70 miles per hour. Riders will experience weightlessness and rapid movements from side to side.

Restraint System: An individual lap bar and seatbelt secures each rider across the thighs and pelvis.

Due to the nature of the restraint, this ride may not accommodate guests of a larger size.

Rider Criteria: Guests must have a minimum of three functioning extremities; one functioning arm and two functioning legs.

Guests with a cervical collar, neck brace, broken collar bone, full arm cast, braced arm cast, or full leg cast are not permitted to ride.

Rider Access: Alternate access is available at the ride exit. Riders will have to transfer into the seat, on their own or with the assistance of a companion.

Lake Erie Eagles

Guests must be 44” tall to ride alone OR 36” tall and accompanied by a supervising companion.

Maximum Weight – 340 lb. per car.

Riders ride in suspended cars that rotate in a circle. Once the ride’s speed increases, riders use a fin on the front of the car to steer the car higher or lower.
A transfer device is available upon request which may assist a rider out of a wheelchair and into the ride unit.

Please do not use the ride restraints for support while entering and exiting, as they will shift.

A wheelchair lift is available to transport guests from the exit to the ride platform. Please use the phone at the base of the lift to request assistance. Limit one rider in wheelchair and one companion in lift at a time.

**NOTE:** Loose articles may not be left on the platform. They may either be left with a non-rider or be placed in lockers for storage.

**WARNING:** This ride contains strobe lighting.

**Matterhorn**

**Guests must be 46” tall to ride alone OR 42” tall and accompanied by a supervising companion.**

**Maximum Weight – 510 lb. per car.**

Flying bob sled ride where cars are pivoted toward a horizontal position by the centrifugal force created by the ride’s rotating table.

**Restraint System:** A shared lap bar and seatbelt secures all riders in the row across the thighs and pelvis.

The smaller rider must sit on the inside seat.

**Rider Criteria:** Guests must have a minimum of three functioning extremities.

Guests with a cervical collar, neck brace, broken collar bone, or braced arm cast are not permitted to ride.

**Rider Access:** Alternate access is available at the ride exit. Riders will have to take several steps, on their own or with the assistance of a companion, and be capable of stepping up and over the side of the ride unit.

Please use caution, as the ride unit may shift when entering and exiting.

Please do not use the ride restraints for support while entering and exiting, as they will shift.

**Maverick®**

**Guests must be between 52” and 78” tall to ride.**

A launch full circuit roller coaster featuring weightlessness, high speed banked turns, and rapid directional changes.

**Restraint System:** A shoulder harness with a between-the-legs safety belt secures each rider over the head and across the chest.

Due to the nature of the restraint, this ride may not accommodate guests of a larger size. A test seat is located at the ride entrance which can be used to evaluate proper fit and comfort prior to waiting in line.

**Rider Criteria:** Guests must have a minimum of three functioning extremities; one functioning arm and two functioning legs.

Guests with a cervical collar, neck brace, broken collar bone, full arm cast, braced arm cast, or full leg cast are not permitted to ride.

Earrings must be removed prior to riding.

Guests with any prosthesis must consult with Guest Services or Town Hall prior to waiting in line or riding.

**Rider Access:** Alternate access is via a gate at the ride entrance. Riders will have to transfer into the seat, on their own or with the assistance of a companion.

Please do not use the ride restraints for support while entering and exiting, as they will shift.

An elevator is available to transport guests to the ride platform.

**NOTE:** Glasses may only be worn on this attraction if they are secured with an athletic strap. Glasses may not be held in the hands of riders while riding.

**WARNING:** This ride contains strobe lighting.

**WARNING:** This ride utilizes magnetic systems during the ride.
Guests must be 52” tall to ride.

A thrill ride that swings riders to a height of 140 feet in a pendulum motion while spinning in a clockwise rotation. Riders will experience weightlessness and rapidly changing forces and direction.

**Restraint System:** A shoulder harness with a between-the-legs safety belt secures each rider over the head and across the chest.

Due to the nature of the restraint, this ride may not accommodate guests of a larger size. A test seat is located at the ride entrance which can be used to evaluate proper fit and comfort prior to waiting in line.

**Rider Criteria:** Guests must have a minimum of two functioning extremities; one functioning arm and one functioning leg.

Two functioning arms are sufficient instead of one functioning arm and one functioning leg if the guest has a normal center of gravity and lower extremities are sufficiently strong to support weight against the restraint under the dynamic conditions of the ride. Amputations must be at the knee or below.

Guests with a cervical collar, neck brace, broken collar bone, full arm cast, braced arm cast, or lower body casts (foot, lower leg, etc.) are not permitted to ride.

Guests with any prosthesis must consult with Guest Services or Town Hall prior to waiting in line or riding. Leg prosthetics are not permitted on this ride. Guests should check with Guest Services or Town Hall to determine if they are eligible to ride without the prosthesis.

**Rider Access:** Alternate access is mainstreamed via the ride entrance. Riders will have to take several steps, on their own or with the assistance of a companion, and be capable of elevating themselves up into the seat.

Please do not use the ride restraints for support while entering and exiting, as they will shift.

**NOTE:** Glasses may only be worn on this attraction if they are secured with an athletic strap. Glasses may not be held in the hands of riders while riding.

**WARNING:** This ride contains strobe lighting.

**Midway Carrousel**

Guests must be 46” tall to ride alone OR accompanied by a supervising companion. Hand held infants must ride in a chariot with a supervising companion.

Antique Carousel that also has chariot seating available. The outer and inner most rows of horses are stationary while the middle rows move up and down.

Children under 46” must be seated in a chariot or on the middle row of horses and be held by a supervising companion who is standing on the platform between horses.

**Rider Criteria:** Riders must have the ability to straddle the ride unit. Riders unable to straddle the ride unit must be seated in a chariot unit.

Riders who do not have independent seated postural control, an appropriate center of gravity, ability to hold on with one functioning arm, or appropriate observed behavior must ride in a chariot with a supervising companion.

Riders with a full leg cast must be seated in a chariot.

**Rider Access:** Alternate access is mainstreamed at the ride entrance. Riders will have to take several steps, on their own or with the assistance of a companion, and be capable of stepping up onto a platform.
**Millennium Force®**

*Guests must be between 48” and 78” tall to ride.*

A high-speed giga roller coaster. Riders will experience weightlessness and rapid movements from side to side.

**Restraint System:** An individual lap bar and seatbelt secures each rider across the thighs and pelvis. The lap bar must be in firm contact with the pelvis and muscular parts of the thighs.

Due to the nature of the restraint, this ride may not accommodate guests of a larger size. A test seat is located at the ride entrance which can be used to evaluate proper fit and comfort prior to waiting in line.

**Rider Criteria:** Guests must have a minimum of three functioning extremities; one functioning arm and two functioning legs.

Guests with a cervical collar, neck brace, broken collar bone, full arm cast, braced arm cast, or full leg cast are not permitted to ride.

Guests with any prosthesis must consult with Guest Services or Town Hall prior to waiting in line or riding.

**Rider Access:** Alternate access is available at the ride exit. Riders will have to take several steps, on their own and be capable of stepping up and over the side of the ride unit.

Please do not use the ride restraints for support while entering and exiting, as they will shift.

**NOTE:** Loose articles may not be left on the platform. They may either be left with a non-rider or be placed in lockers for storage.

**WARNING:** This ride utilizes magnetic systems during the ride.

**WARNING:** This ride contains strobe lighting.

---

**Mine Ride**

*Guests must be 48” tall to ride.*

A wood and steel roller coaster. Riders will experience rapid changes in direction.

**Restraint System:** A shared lap bar is positioned above the laps of all riders in the row. An individual seatbelt secures each rider across the thighs and pelvis.

Due to the nature of the restraint, this ride may not accommodate guests of a larger size.

**Rider Criteria:** Guests must have a minimum of two functioning extremities; one functioning arm and one functioning leg.

Two functioning arms are sufficient instead of one functioning arm and one functioning leg if the guest has a normal center of gravity and lower extremities are sufficiently strong to support weight against the restraint under the dynamic conditions of the ride. Amputations must be at the knee or below.

Guests with a cervical collar, neck brace, broken collar bone, braced arm cast, or full leg cast are not permitted to ride.

**Rider Access:** Alternate access is available at the ride exit. Riders will have to take several steps, on their own and be capable of stepping up and over the side of the ride unit.

A wheelchair lift is available to transport guests from the exit to the ride platform. Please use the phone at the base of the lift to request assistance. Limit one rider in wheelchair and one companion in lift at a time.
**Monster**

![Monster symbol]

Guests must be 46” tall to ride alone OR accompanied by a supervising companion. Hand held infants are not permitted.

**Maximum Weight – 400 lb. per car.**

A circular ride where the sweeps move in a clockwise direction while the arms move up and down in a counterclockwise direction.

**Restraint System:** A bucket with a safety pin encapsulates the riders.

Due to the nature of the restraint, this ride may not accommodate guests of a larger size.

**Rider Criteria:** Guests must have a minimum of two functioning extremities; one functioning arm and one functioning leg.

Two functioning arms are sufficient instead of one functioning arm and one functioning leg if the guest has a normal center of gravity and lower extremities are sufficiently strong to support weight against the restraint under the dynamic conditions of the ride. Amputations must be at the knee or below.

Guests with a cervical collar, neck brace, broken collar bone, or braced arm are not permitted to ride.

**Rider Access:** Alternate access is available at the ride exit. Riders will have to take several steps, on their own or with the assistance of a companion, and be capable of stepping up into the ride unit.

Please use caution, as the ride unit may shift when entering and exiting.

**Pipe Scream**

![Pipe Scream symbol]

Guests must be 48” tall to ride alone OR 42” tall and accompanied by a supervising companion.

A swinging ship that produces a feeling of weightlessness as it swings back and forth.

**Restraint System:** A shared lap bar secures all riders in the row across the thighs and pelvis. A door further encloses the ride unit.

Due to the nature of the restraint, this ride may not accommodate guests of a larger size.

**Rider Access:** Alternate access is mainstreamed via the ride entrance. Riders will have to transfer into the seat, on their own or with the assistance of a companion.

Please use caution, as the ride unit may shift when entering and exiting.

**Ocean Motion**

![Ocean Motion symbol]

Guests must be 48” tall to ride alone OR 39” tall and accompanied by a supervising companion.

A swinging ship that produces a feeling of weightlessness as it swings back and forth.

**Restraint System:** A shared lap bar is positioned above the laps of all riders in the row.

Riders between 39” and 48” tall must be seated in the center two rows of the ship and sit towards the middle of the row with their supervising companion.

**Rider Criteria:** Guests must have a minimum of three functioning extremities.

Two functioning arms are sufficient instead of three functioning extremities if the guest has a normal center of gravity and lower extremities are sufficiently strong to maintain proper riding posture under the dynamic conditions of the ride. Amputations must be at the knee or below.
Guests with a cervical collar, neck brace, broken collar bone, or braced arm cast are not permitted to ride. Arm casts must not be positioned next to another rider.

**Rider Access:** Alternate access is available at the ride exit. Riders will have to transfer into the seat, on their own or with the assistance of a companion. To facilitate boarding, a row with a larger opening is available upon request. Please inform an associate if you wish to use that row.

A wheelchair lift is available to transport guests from the exit to the ride platform. Please use the phone at the base of the lift to request assistance. Limit one rider in wheelchair and one companion in lift at a time.

---

**PLANET SNOOPY™**

**Flying Ace™ Balloon Race**

**Guests must be 42” tall to ride alone OR be accompanied by a supervising companion. Hand held infants are not permitted.**

**Maximum Weight – 300 lb per car.**

This ride only accommodates one rider over 54” per balloon.

PEANUTS™ themed hot air balloon ride that spins and raises riders in the air.

**Restraint System:** An individual seatbelt secures each rider across the thighs and pelvis. A door further encloses the ride unit.

**Rider Criteria:** Guests must have a minimum of three functioning extremities.

Guests with a cervical collar, neck brace, or broken collar bone are not permitted to ride.

**Rider Access:** Alternate access is mainstreamed via the ride entrance. Riders will have to transfer into the seat, on their own or with the assistance of a companion.

Please use caution, as the ride unit may shift when entering and exiting.

---

**Joe Cool’s™ Dodgem School**

**Guests must be between 35” and 53” tall to ride.**

**Restraint System:** An individual shoulder strap is positioned across the chest and under the arms of each rider.

**Rider Criteria:** Guests must have a minimum of three functioning extremities.

Guests with a cervical collar, neck brace, or broken collar bone, or braced arm cast are not permitted to ride.

Guests with a visual impairment must ride as a passenger with a driver who meets the requirements to drive.

**Rider Access:** Alternate access is available through a gate near the ride entrance. Riders will have to transfer into the seat, on their own or with the assistance of a companion.

---

**Kite Eating Tree**

**Guests must be between 36” and 54” tall to ride.**

**Maximum Weight – 660 lb. per ride.**

PEANUTS™ themed children’s ride that hoists riders up in the air and provides a gentle yet bouncy trip down.

**Restraint System:** A shared lap bar is positioned above the laps of all riders in the row. An individual seatbelt secures each rider across the thighs and pelvis.

**Rider Criteria:** Guests must have a minimum of two functioning extremities; one functioning arm (excluding prosthesis) and one functioning leg.

Guests with a cervical collar, neck brace, broken collar bone, braced arm cast, or full leg cast are not permitted to ride.

**Rider Access:** Alternate access is mainstreamed via the ride entrance. Riders will have to take several steps, on their own or with the
assistance of a companion, and be capable of elevating themselves up into the seat.

Please do not use the ride restraints for support while entering and exiting, as they will shift.

**PEANUTS™ Road Rally**

Students must be 42” tall to ride alone OR be accompanied by a supervising companion. Hand held infants are not permitted.

**Maximum Weight – 440 lb per car.**

Maximum of 1 adult per car.

This ride is a miniature truck ride that follows an electric track in a “train-like” fashion.

**Restraint System:** An individual seatbelt secures each rider across the thighs and pelvis.

**Rider Criteria:** Guests must have a minimum of three functioning extremities.

**Rider Access:** Alternate access is mainstreamed via the ride entrance. Riders will have to take several steps, on their own or with the assistance of a companion, and be capable of stepping up and over the side of the ride unit.

**Snoopy’s™ Deep Sea Divers**

Students must be 42” tall to ride alone OR be accompanied by a supervising companion. Hand held infants are not permitted.

**Maximum weight – 440 lb. per row.**

This ride only accommodates one adult per row.

PEANUTS™ themed submarine with six rows that seats four guests per row. The submarine rotates both in a clockwise and counter-clockwise direction reaching a height of over 20 feet.

**Restraint System:** A shared lap bar secures all riders in the row across the thighs and pelvis. A door further encloses the ride unit.

**Rider Criteria:** Guests must have a minimum of two functioning extremities; one functioning arm (excluding prosthesis) and one functioning leg.

Guests must demonstrate appropriate observed behavior or ride with a supervising companion.

Guests with a cervical collar or neck brace are not permitted to ride.

**Rider Access:** Alternate access is mainstreamed via the ride entrance. Riders will have to transfer into the seat, on their own or with the assistance of a companion.

**Snoopy’s™ Express Railroad**

Students must be 36” tall ride alone OR be accompanied by a supervising companion. Hand held infants are not permitted.

**Maximum Weight – 880 lb. per car.**

Maximum of 2 adults per uncovered car.

PEANUTS™ themed kiddy train ride featuring 5 rail cars on a figure 8 railroad track.

**Restraint System:** A shared seatbelt secures all riders in the row across the thighs and pelvis.

Due to the nature of the restraint, this ride may not accommodate guests of a larger size.

Adults may only ride in the uncovered cars.

**Rider Criteria:** Guests must demonstrate seated postural control and appropriate observed behavior or ride with a supervising companion.

Guests must have sufficient lower extremities to maintain the proper riding position.

**Rider Access:** Alternate access is mainstreamed via the ride entrance. Riders will have to transfer into the seat, on their own or with the assistance of a companion.
**Snoopy’s™ Space Race**

Guests must be between 36” and 54” tall to ride.

PEANUTS™ themed children’s space ship ride that goes up and down as the ride rotates around in a circle. Riders can use a joystick to control the elevation of their unit.

**Restraint System:** An individual seatbelt secures each rider across the thighs and pelvis.

**Rider Criteria:** Guests must have a minimum of two functioning extremities; one functioning arm and one functioning leg.

Guests with a cervical collar, neck brace, or full leg cast are not permitted to ride.

**Rider Access:** Alternate access is mainstreamed via the ride entrance. Riders will have to take several steps, on their own or with the assistance of a companion, and be capable of stepping up and over the side of the ride unit.

Please use caution, as the ride unit may shift when entering and exiting.

---

**Woodstock’s™ Whirlybirds**

Guests must be 42” tall to ride alone OR be accompanied by a supervising companion. Hand held infants are not permitted.

**Maximum Weight** – 440 lb per car.

This is a PEANUTS™ themed family tea cup spinning ride that travels a circular path where the riders can spin their own cars.

**Restraint System:** An individual seatbelt secures each rider across the thighs and pelvis. A door further encloses the ride unit.

**Rider Criteria:** Guests must have a minimum of two functioning extremities; one functioning arm (excluding prosthesis) and one functioning leg.

Guests with a cervical collar, neck brace, broken collar bone, full arm cast, braced arm cast, or full leg cast are not permitted to ride.

---

**Power Tower**

Guests must be 52” tall to ride.

A tower ride with a chair lift-type seat where riders are propelled up or shot down at high speeds. Riders will experience the feeling of weightlessness and elevation change as they ascend and descend each ride tower.

**Restraint System:** A shoulder harness with a between-the-legs safety belt secures each rider over the head and across the chest.

Due to the nature of the restraint, this ride may not accommodate guests of a larger size.

**Rider Criteria:** Guests must have at least one functioning arm and sufficient lower extremities to ensure the ride restraint system adequately restrains them.

Guests with a cervical collar, neck brace, broken collar bone, full arm cast, braced arm cast, or full leg cast are not permitted to ride.

Guests with any type of prosthesis should not ride unless they can ensure the device is properly secured and will remain in place during the ride.

**Rider Access:** Alternate access is available at the ride exit. Riders will have to take several steps, on their own or with the assistance of a companion, and be capable of elevating themselves up into a suspended seat.

Please do not use the ride restraints for support while entering and exiting, as they will shift.
Professor Delbert’s Frontier Fling
A Skycoaster® Experience

Guests must be 48” tall to ride.

Maximum Weight – 850 lb. per flight.

A high-thrill Skycoaster attraction made to simulate flight. Riders are hoisted 150 feet into the air and control their own ride experience by pulling the ripcord, initiating their tethered freefall descent and flight. The sensation of flight as riders fall is similar to skydiving and hang gliding, with riders reaching speeds up to 65 miles per hour.

Restraint System: Riders wear a full body harness that supports the rider in a prone position. The harness is connected to the flight support cables.

Rider Criteria: Guests are required to have a minimum of one functioning leg and by reason of the restraint system inherent in the flight suit, it is necessary that the rider possesses two arms sufficient for proper functioning of the flight suit be maintained. Lower extremities must be of sufficient enough length to be contained and restrained by a leg strap.

Proper Functioning of the flight suit must be maintained for riders without appropriate center of gravity.

Guests with a cervical collar, neck brace, broken collar bone, full arm cast, braced arm cast, or full leg cast are not permitted to ride.

Rider Access: Alternate Access is mainstreamed via the ride entrance. Riders must be able to walk independently or be assisted by a member of their party.

NOTE: This is an extra charge attraction.

Raptor

Guests must be 54” tall to ride.

A high-speed, inverted looping roller coaster which turns riders upside down six times. Riders will experience weightlessness and rapid movements from side to side.

Restraint System: A shoulder harness with a between-the-legs safety belt secures each rider over the head and across the chest.

Due to the nature of the restraint, this ride may not accommodate guests of a larger size. A test seat is located at the ride entrance which can be used to evaluate proper fit and comfort prior to waiting in line.

Rider Criteria: Guests must have a minimum of three functioning extremities.

Two functioning arms are sufficient instead of three functioning extremities if the guest has a normal center of gravity and lower extremities are sufficiently strong to maintain proper riding posture under the dynamic conditions of the ride. Amputations must be at the knee or below.

Guests with a cervical collar, neck brace, or broken collar bone not permitted to ride. Casts are not permitted on this ride.

Alternatively, guests with certain amputations may be able to ride with the use of a separate full body harness provided the guest has remaining leg and arm remnants to be secured by the harness. Prosthetics are not permitted on this ride. Guests should check with Guest Services to determine if they are eligible to ride using the full body harness.

Rider Access: Alternate access is available at the ride exit. Riders will have to take several steps, on their own or with the assistance of a companion, and be capable of elevating themselves up into the seat.

Please do not use the ride restraints for support while entering and exiting, as they will shift.

A wheelchair lift is available to transport guests to the ride platform. Please use the phone at the base of the lift to request assistance. Limit one rider in wheelchair and one companion in lift at a time.

WARNING: This ride contains strobe lighting.
Rougarou®

Guests must be between 54” and 78” tall to ride.

A high-speed, floorless looping roller coaster which turns riders upside down five times. Riders will experience weightlessness and rapid movements from side to side.

**Restraint System:** A shoulder harness with a between-the-legs safety belt secures each rider over the head and across the chest.

Due to the nature of the restraint, this ride may not accommodate guests of a larger size. A test seat is located at the ride entrance which can be used to evaluate proper fit and comfort prior to waiting in line.

**Rider Criteria:** Guests must have a minimum of three functioning extremities.

Two functioning arms are sufficient instead of three functioning extremities if the guest has a normal center of gravity and lower extremities are sufficiently strong to maintain proper riding posture under the dynamic conditions of the ride. Amputations must be at the knee or below.

Guests with a cervical collar, neck brace, or broken collar bone are not permitted to ride. Casts are not permitted on this ride.

Alternatively, guests with certain amputations may be able to ride with the use of a separate full body harness provided the guest has remaining leg and arm remnants to be secured by the harness. Prosthetics are not permitted on this ride. Guests should check with Guest Services to determine if they are eligible to ride using the full body harness.

It is recommended that earrings be removed prior to riding.

**Rider Access:** Alternate access is available at the ride exit. Riders will have to take several steps, on their own or with the assistance of a companion, and be capable of elevating themselves up into a suspended seat.

Please do not use the ride restraints for support while entering and exiting, as they will shift.

A wheelchair lift is available to transport guests from the exit to the ride platform. Please use the phone at the base of the lift to request assistance. Limit one rider in wheelchair and one companion in lift at a time.

**NOTE:** Loose articles may not be left on the platform. They may either be left with a non-rider or be placed in lockers for storage.

**WARNING:** This ride contains strobe lighting.

**WARNING:** This ride utilizes magnetic systems during the ride.

Scrambler

Guests must be 48” tall to ride alone OR 36” tall and accompanied by a supervising companion.

**Maximum Weight – 510 lb. per car.**

Rotating cars are mounted on counter-rotating arms, which produces strong accelerations and side-to-side movement, changing force and direction rapidly.

**Restraint System:** A shared lap bar is positioned above the laps of all riders in the row. A shared seatbelt secures each rider across the thighs and pelvis.

**Rider Criteria:** Guests must have a minimum of two functioning extremities; one functioning arm and one functioning leg.

Two functioning arms are sufficient instead of one functioning arm and one functioning leg if the guest has a normal center of gravity and lower extremities are sufficiently strong to support weight against the restraint under the dynamic conditions of the ride. Amputations must be at the knee or below. Guests may have two functioning legs instead of one functioning arm and one functioning leg.

Guests with a cervical collar, neck brace, broken collar bone, or braced arm cast are not permitted to ride.
**Rider Access:** Alternate access is available at the ride exit. Riders will have to take several steps, on their own or with the assistance of a companion, and be capable of entering and exiting elevated vehicles which may shift.

**Sky Ride**

Guests must be 48” tall to ride alone OR be accompanied by a supervising companion.

*Maximum weight – 680lb. per cabin.*

A cable car ride with gondolas suspended from an overhead moving cable.

**Restraint System:** A door with a safety lock secures the ride unit to secure the riders.

**Rider Criteria:** Guests must have at least one functioning arm with a minimum of two functioning extremities. Hand held infants and guests who do not have appropriate observed behavior must be accompanied by a supervising companion.

**Rider Access:** Alternate access is mainstreamed via the ride entrance. Riders will have to take several steps, on their own or with the assistance of a companion, and be capable of elevating themselves up into the seat.

Please do not use the ride restraints for support while entering and exiting, as they will shift.

**NOTE:** Glasses may only be worn on this attraction if they are secured with an athletic strap. Glasses may not be held in the hands of riders while riding.

The manufacturer prohibits persons with a fear of heights from riding Skyhawk.

**Skyhawk**

Guests must be 48” tall to ride.

A high speed ride featuring two giant swinging arms with 20 seats on each arm. Riders will be pushed towards the sky and experience weightlessness as they reverse direction.

**Restraint System:** An individual lap bar with safety belt secures each rider across the thighs and pelvis.

Due to the nature of the restraint, this ride may not accommodate guests of a larger size. A test seat is located at the ride entrance which can be used to evaluate proper fit and comfort prior to waiting in line.

**Rider Criteria:** Guests must have a minimum of three functioning extremities.

Two functioning arms are sufficient instead of three functioning extremities if the guest has a normal center of gravity and lower extremities are sufficiently strong to maintain proper riding posture under the dynamic conditions of the ride. Amputations must be at the knee or below.

Guests with a cervical collar, neck brace, broken collar bone, full arm cast, braced arm cast, or full leg cast are not permitted to ride.

Guests with any type of prosthesis should not ride unless they can ensure the device is properly secured and will remain in place during the ride. Guests with any leg prosthesis must consult with Guest Services or Town Hall prior to waiting in line or riding.

**Rider Access:** Alternate access is available at the ride exit. Riders will have to walk up the stairs to a second story platform, take several steps, on their own or with the assistance of a companion, and be capable of stepping up into the ride unit.

Please use caution, as the ride unit may shift when entering and exiting.

Wheelchairs cannot be accommodated in the gondolas, and must be left at the bottom of the exit stairs.

**SlingShot**

Guests must be between 48” and 79” tall to ride.

*Minimum Weight – 110lb. per launch.*

A two-person capsule that is attached to steel cables and propels riders in the air. Riders will experience weightlessness, rapid movements from side to side, and rapidly changing forces/directions.
**Restraint System:** A shoulder harness with a between-the-legs safety belt secures each rider over the head and across the chest.

Due to the nature of the restraint, this ride may not accommodate guests of a larger size.

**Rider Criteria:** Guests must have a minimum of two functioning extremities; one functioning arm and one functioning leg.

Two functioning arms are sufficient instead of one functioning arm and one functioning leg if the guest has a normal center of gravity and lower extremities are sufficiently strong to support weight against the restraint under the dynamic conditions of the ride. Amputations must be at the knee or below.

Guests with a cervical collar, neck brace, broken collar bone, full arm cast, braced arm cast, or full leg cast are not permitted to ride.

**Rider Access:** Alternate access is mainstreamed via the ride entrance. Riders will have to take several steps, on their own or with the assistance of a companion, and be capable of elevating themselves up into the seat.

**NOTE:** This is an extra charge attraction.

---

**Snake River Falls**

*Guests must be 48” tall to ride.*

An 80 foot high Shoot-the-Chutes water ride with 4 twenty passenger boats.

**Restraint System:** A shared lap bar is positioned above the laps of all riders in the row.

**Rider Criteria:** Guests must have a minimum of three functioning extremities.

Guests with a cervical collar, neck brace, broken collar bone, full arm cast, braced arm cast, or full leg cast are not permitted to ride.

**Rider Access:** Alternate access is available at the ride entrance. Riders will have to take several steps, on their own or with the assistance of a companion, and be capable of stepping down into the ride unit.

Watch your step, as the ride unit may be slippery and wet.
Please do not use the ride restraints for support while entering and exiting, as they will shift.

**NOTE:** Loose articles may not be left on the platform. They may either be left with a non-rider or be placed in lockers for storage.

Glasses may only be worn on this attraction if they are secured with an athletic strap. Glasses may not be held in the hands of riders while riding.

**WARNING:** This ride utilizes magnetic systems during the ride.

**WARNING:** This ride contains strobe lighting.

### Super Himalaya

![Super Himalaya](image)

**Guests must be 52” tall to ride alone OR accompanied by a supervising companion. Riders less than 8 years old must be accompanied by a supervising companion.**

**Maximum Weight – 495 lb. per car.**

A high speed circular ride which follows a steeply rolling up and down table. Riders will experience side to side forces.

**Restraint System:** A shared lap bar is positioned above the laps of all riders in the row. A shared seatbelt secures all riders in the row across the thighs and pelvis.

The smaller rider must sit on the inside seat.

**Rider Criteria:** Guests must have a minimum of two functioning extremities; one functioning arm and one functioning leg.

Two functioning arms are sufficient instead of one functioning arm and one functioning leg if the guest has a normal center of gravity and lower extremities are sufficiently strong to support weight against the restraint under the dynamic conditions of the ride. Amputations must be at the knee or below.

Two functioning legs are sufficient instead of two functioning arms.

Guests with a cervical collar, neck brace, broken collar bone, or braced arm cast are not permitted to ride.

**Rider Access:** Alternate access is available at the ride exit. Riders will have to take several steps, on their own or with the assistance of a companion, and be capable of stepping into and out of a steeply inclined ride unit.

### Thunder Canyon

![Thunder Canyon](image)

**Guests must be 46” tall to ride.**

A water ride where riders travel in rafts along a man-made river full of rapids, geysers, canyons, and waterfalls. Rafts float and bounce down high-speed rapids, often rotating rapidly after impacting with the bank of the river.

**Restraint System:** A shared seatbelt secures all riders in the row across the thighs and pelvis.

**Rider Criteria:** Guests must have a minimum of three functioning extremities.

Guests with a cervical collar, neck brace, broken collar bone, full arm cast, or braced arm cast are not permitted to ride.

**Rider Access:** Alternate access is available to the right of the ride’s exit. Riders will have to take several steps, on their own or with the assistance of a companion, and be capable of stepping down into the ride unit.

Please use caution, as the ride unit may shift when entering and exiting.

Watch your step, as the ride unit may be slippery and wet.

**NOTE:** Loose articles, including footwear, may not be left on the platform. All loose articles must be brought onboard the raft with riders. These items will get wet. Please consider leaving loose articles with a non-rider.

Boats may bump into the side of channel and other boats.

**WARNING:** You will get wet on this ride.
Tiki Twirl

Guests must be 46” tall to ride alone OR accompanied by a supervising companion. Hand held infants are not permitted.

A circular ride where ride units move in the opposite direction of the ride table, spinning riders in two opposing directions. Riders will experience rapid movements from side to side.

Restraint System: A shared lap bar and seatbelt secures all riders in the row across the thighs and pelvis.

The smaller rider must sit on the inside seat.

Rider Criteria: Guests must have a minimum of two functioning extremities; one functioning arm and one functioning leg.

Two functioning arms are sufficient instead of one functioning arm and one functioning leg if the guest has a normal center of gravity and lower extremities are sufficiently strong to support weight against the restraint under the dynamic conditions of the ride. Amputations must be at the knee or below.

Guests with a cervical collar, neck brace, broken collar bone, or braced arm cast are not permitted to ride.

Rider Access: Alternate access is available at the ride exit. Riders will have to take several steps, on their own and be capable of stepping up and over the side of the ride unit.

Please do not use the ride restraints for support while entering and exiting, as they will shift.

Top Thrill Dragster®

Guests must be between 52” and 78” tall to ride.

A high-speed strata roller coaster. Riders will experience weightlessness, strong positive forces, and rapid movements from side to side.

Restraint System: An individual lap bar and seatbelt secures each rider across the thighs and pelvis. The lap bar must be in firm contact with the pelvis and muscular parts of the thighs.

Due to the nature of the restraint, this ride may not accommodate guests of a larger size. A test seat is located at the ride entrance which can be used to evaluate proper fit and comfort prior to waiting in line.

Rider Criteria: Guests must have a minimum of three functioning extremities; one functioning arm and two functioning legs.

Guests with a cervical collar, neck brace, broken collar bone, full arm cast, braced arm cast, or full leg cast are not permitted to ride.

Guests with any prosthesis must consult with Guest Services or Town Hall prior to waiting in line or riding.

Rider Access: Alternate access is available at the ride exit. Riders will have to take several steps, on their own and be capable of stepping up and over the side of the ride unit.

Please do not use the ride restraints for support while entering and exiting, as they will shift.

NOTE: Loose articles may not be left on the platform. They may either be left with a non-rider or be placed in lockers for storage.

Glasses may only be worn on this attraction if they are secured with an athletic strap. Glasses may not be held in the hands of riders while riding.

WARNING: This ride contains strobe lighting.

WARNING: This ride utilizes magnetic systems during the ride.

Troika
Restraint System: A shared lap bar and seatbelt secures all riders in the row across the thighs and pelvis.

Rider Criteria: Guests must have a minimum of two functioning extremities; one functioning arm and one functioning leg.

Two functioning arms are sufficient instead of one functioning arm and one functioning leg if the guest has a normal center of gravity and lower extremities are sufficiently strong to support weight against the restraint under the dynamic conditions of the ride. Amputations must be at the knee or below.

Guests with a cervical collar, neck brace, or braced arm cast are not permitted to ride.

Rider Access: Alternate access is available at the ride exit. Riders will have to take several steps, on their own or with the assistance of a companion, and be capable of stepping up into the ride unit.

Please use caution when entering and exiting as the ride unit may shift. Do not use the ride restraints for support as they will shift.

Valravn®

Guests must be between 52” and 78” tall to ride.

A high-speed, floorless looping dive roller coaster which turns riders upside down three times. Riders will experience weightlessness and rapid movements from side to side.

Restraint System: A shoulder harness with a between-the-legs safety belt secures each rider over the head and across the chest.

Due to the nature of the restraint, this ride may not accommodate guests of a larger size. A test seat is located at the ride entrance which can be used to evaluate proper fit and comfort prior to waiting in line.

Rider Criteria: Guests must have a minimum of three functioning extremities.

Two functioning arms are sufficient instead of three functioning extremities if the guest has a normal center of gravity and lower extremities are sufficiently strong to maintain proper riding posture under the dynamic conditions of the ride. Amputations must be at the knee or below.

Guests with a cervical collar, neck brace, or broken collar bone are not permitted to ride. Casts are not permitted on this ride.

Alternatively, guests with certain amputations may be able to ride with the use of a separate full body harness provided the guest has remaining leg and arm remnants to be secured by the harness. Prosthetics are not permitted on this ride. Guests should check with Guest Services to determine if they are eligible to ride using the full body harness.

Rider Access: Alternate access is available at the ride exit. Riders will have to take several steps, on their own or with the assistance of a companion, and be capable of elevating themselves up into a suspended seat.

Please do not use the ride restraints for support while entering and exiting, as they will shift.

An elevator is available to transport guests from the exit to the ride platform.

NOTE: Loose articles may not be left on the platform. They may either be left with a non-rider or be placed in lockers for storage.

Glasses may only be worn on this attraction if they are secured with an athletic strap. Glasses may not be held in the hands of riders while riding.

WARNING: This ride utilizes magnetic systems during the ride.

WARNING: This ride contains strobe lighting.

Wave Swinger

Guests must be 48” tall to ride.

Maximum Weight – 230 lb. per rider.

A chair swing ride with free hanging seats suspended from an elevated, rotating, and slanting tower. Riders will rotate in a circular motion as the tower begins to rise.

Restraint System: An individual lap bar and a between-the-leg safety belt secures each rider.
Due to the nature of the restraint, this ride may not accommodate guests of a larger size.

**Rider Criteria:** Guests must have a minimum of three functioning extremities.

Two functioning arms are sufficient instead of three functioning extremities if the guest has a normal center of gravity and lower extremities are sufficiently strong to maintain proper riding posture under the dynamic conditions of the ride. Amputations must be at the knee or below.

Guests with a cervical collar, neck brace, broken collar bone, full arm cast, braced arm cast, or full leg cast are not permitted to ride.

Guests with any type of prosthesis should not ride unless they can ensure the device is properly secured and will remain in place during the ride.

**Rider Access:** Alternate access is available at the ride exit. Riders will have to take several steps, on their own or with the assistance of a companion, and be capable of elevating themselves up into the seat.

Please use caution, as the ride unit may shift when entering and exiting.

---

**Wicked Twister**

**Guests must be between 52” and 78” tall to ride.**

A twisting impulse coaster using linear induction motors to launch riders both forward and backward. Riders will experience changes in speed and direction, weightlessness, and rapid movements from side to side.

**Restraint System:** A shoulder harness with safety belt secures each rider over the head and across the chest.

Due to the nature of the restraint, this ride may not accommodate guests of a larger size. A test seat is located at the ride entrance which can be used to evaluate proper fit and comfort prior to waiting in line.

**Rider Criteria:** Guests must have a minimum of three functioning extremities.

Two functioning arms are sufficient instead of three functioning extremities if the guest has a normal center of gravity and lower extremities are sufficiently strong to maintain proper riding posture under the dynamic conditions of the ride. Amputations must be at the knee or below.

Guests with a cervical collar, neck brace, broken collar bone, full arm cast, braced arm cast, or full leg cast are not permitted to ride.

Guests with any prosthesis must consult with Guest Services or Town Hall prior to waiting in line or riding.

---

**WindSeeker**

**Guests must be 52” tall to ride.**

A chair swing ride while spreading its arms, swings riders in a circular motion at a 45 degree angle at speeds up to 30 miles per hour as the swings climb the tower.

**Restraint System:** An individual lap bar and a between-the-leg safety belt secures each rider.

Due to the nature of the restraint, this ride may not accommodate guests of a larger size.

**Rider Criteria:** Guests must have a minimum of two functioning extremities; one functioning arm and one functioning leg.

Guests must have a minimum of one full functioning leg (excluding prosthesis) and one leg amputated below the knee.

Guests with a cervical collar, neck brace, broken collar bone, braced arm cast, or full leg cast are not permitted to ride.

Guests with any prosthesis must consult with Guest Services or Town Hall prior to waiting in line or riding.
**Rider Access:** Alternate access is mainstreamed via the ride entrance. Riders will have to take several steps, on their own or with the assistance of a companion, and be capable of elevating themselves up into the seat.

Please use caution when entering and exiting as the ride unit may shift. Do not use the ride restraints for support as they will shift.

**WARNING:** This ride contains strobe lighting.

**Witches’ Wheel**

*Guests must be 54” tall to ride.*

A spinning thrill ride where gondolas quickly increase in speed from a horizontal position to a vertical position, thereby turning riders upside down. Riders will experience weightlessness and rapid movements from side to side.

**Restraint System:** A door with a safety chain encapsulates the ride unit to secure riders.

**Rider Criteria:** Guests must have a minimum of three functioning extremities.

Guests with a cervical collar, neck brace, broken collar bone, braced arm cast, or full leg cast are not permitted to ride.

**Rider Access:** Alternate access is available at the ride exit. Riders will have to take several steps, on their own or with the assistance of a companion, and be capable of stepping up and over the side of the ride unit.

Please use caution when entering and exiting as the ride unit may shift. Do not use the ride restraints for support as they will shift.

---

**SHOWS/ENTERTAINMENT**

Due to the popularity of our shows, we suggest that you arrive early as seating may be limited. Show schedules are available at Guest Services, Town Hall and at any theatre entrance.

All Entertainment venues are accessible to guests who are mobility impaired. Assisted listening devices may be available for guests who are hearing impaired. Large print scripts may also be available. Ask any associate at the venue for assistance.

**Camp Snoopy™ Theatre**

Various performances of fun from Charlie Brown™ and the PEANUTS™ gang.

**Celebration Plaza Stage**

*Location: Near the Main Train Station*

**Fire & Ice Stage**

*Location: Near Windseeker on the Wicked Twister midway*

**Gossip Gulch Stage**

*Location: FrontierTown*

**Jack Aldrich Theatre**

*Located in the front of the park across from the Sky Ride.*

**Live Shows Hot Spot**

*Location: Near the Sky Ride West station on the Main Midway near Auntie Anne’s*

**Lusty Lil’s Palace**

*Location: FrontierTown next to train station.*

Offers a variety of live entertainment shows. Cold beer, pop and various sandwiches are also available.

**Planet Snoopy**

Various performances of fun from Snoopy and the PEANUTS™ gang.

**Red Garter Saloon**

*Location: Entrance to Frontier Trail across from the Millennium Force*

Offers a variety of live entertainment shows. Cold beer, pop and various sandwiches are also available.

**Village Square Gazebo**

*Location: FrontierTown*
DINOSAURS ALIVE!

Dinosaurs Alive is Cedar Point’s unique, multi-sensory, interactive dinosaur park with over 50 full-sized creations made to replicate nearly every feature of the dinosaurs. Several dinosaurs have interactive consoles which allow guests to guide dinosaur movement so they can see how scientists believe each dinosaur moved its arms, tail, mouth and eyes. There is also an excavation site replica, a kids’ paleontological dig site where visitors can uncover prehistoric fossils, and a dinosaur-themed gift shop.

The Dinosaurs Alive entrance and exit is located beside the Dino Store and next to Camp Snoopy™. The entire trail is wheelchair accessible. At the dig site, guests must be able to transfer to ground level on their own or with the assistance of a companion. To facilitate the transfer, a transfer device is available. Please ask a Dino Guide for assistance.

A separate admission ticket is required for this attraction. The trail closes at dusk.

HALLOWEEKENDS®

Warning

Theatrical Fog effects, areas of low lighting, loud music and sound effects and strobe lighting are used throughout the park during HalloWeekends, including on our midways, outdoor scare zones, indoor mazes, live entertainment venues and children’s attractions.

Guests with respiratory sensitivities, history of seizures or epilepsy, or sensitivities to loud music and sound effects are advised not to participate in these attractions.

Please adhere to all posted and verbal warnings and directions. Characters in our HalloWeekend attractions will not touch you: please do not touch them in any manner. Guests who do will be removed from the park without refund. Rowdy behavior and profanity are also cause for removal from the park.

Alternate Access is available via the entrance. Guests in Electric wheelchairs must transfer to a manual wheelchair to enter Mazes.

VIRTUAL REALITY ATTRACTIONS

Some attractions may be equipped with the use of a virtual reality (VR) headset. The use of VR attractions is participatory in nature. Guests participating in any VR experience must be at least 13 years old, must not be under the influence of alcohol or drugs, not have digestive problems, not have emotional stress or anxiety, and be free from the suffering of any cold, flu, headaches, migraines, or earaches. Guests with a history of seizures must not participate in any VR attraction. Guests with a pacemaker or other implanted medical device, or are pregnant, may also not participate in any VR attraction. Eyeglasses may not be worn with the VR headset, but the optics of the headset may be adjusted to focus the device. When participating in any VR attraction, please note any additional safety requirement that may be highlighted on the attraction’s Rider Safety Guide sign.
CEDAR POINT SHORES

Cedar Point Shores offers slides, activity areas and a wave pool and is open to the public. Cedar Point admission is not required. This attraction has a separate fee. Please note height requirements at the entrance to each attraction. Height measurements at Cedar Point Shores are taken in bare feet. Swim diapers are required.

Appropriate swimwear is required. Thongs and transparent clothing are not permitted. We reserve the right to determine the appropriateness of swimwear.

In an ongoing effort to provide a safe and enjoyable waterpark experience for our guests, we routinely utilize training exercises to improve our lifeguards’ skills and vigilance. These exercises will occur during normal operating hours and may consist of the following: submersible water mannequins and shadow dolls; the use of video surveillance equipment; internal and external audits; and active water rescue and/or first aid scenarios.

The Cedar Point Shores First Aid Station is open during Cedar Point Shores Operating Hours and is located across from Crosscurrent slide complex. Refrigeration for medication, with the exception of bee sting anaphylaxis kits, is available at First Aid, and medical equipment can be stored.

Life Jackets Life jackets are required for children who are less than 48” tall in bare feet or those who are inexperienced or non-swimmers. Life jackets are available for all guests needing special consideration. Children who are less than 42” tall must wear life jackets and be accompanied by a supervising companion. Only Coast Guard approved life jackets are allowed as flotation devices. Select attractions may require Life Jackets for different height ranges. Life jackets are provided free of charge for guests who require one.

**Breakwater Bay Wave Pool** ![4 Stars]

Persons less than 48 inches tall must wear a life vest. Persons less than 42 inches tall must also be accompanied by a supervising companion. At this attraction, a supervising companion may accompany up to two children.

A large wave pool with depths ranging from zero to six feet. Waves run on a “10 minutes on, 10 minutes off” cycle. Participation and water depth may be restricted if necessary. Only strong swimmers are recommended in deep water.

**Rider Criteria:** Guests must have a minimum of two functioning extremities or be accompanied by a supervising companion. Hand Held Infants participation or water depth may be restricted if necessary and must be accompanied by a supervising companion.

Braced arm casts, full leg casts, cervical collars or neck braces, or broken collar bones are not permitted. Guests with Forearm casts, Full arm casts, foot or lower leg casts are welcome to enjoy the attraction, but participation or water depth may be restricted if necessary.

**Cedar Creek** ![2 Stars]

Persons less than 48 inches tall must wear a life vest. Persons less than 42 inches tall must also be accompanied by a supervising companion. At this attraction, a supervising companion may accompany up to two children.

1,200 foot winding river tube ride which is 36 inches deep with a tunnel.

**Rider Criteria:** Participants may float freely, with or without a tube, in the direction of the current.

Guests must have a minimum of one functioning arm and one functioning leg, or be accompanied by a supervising companion. Hand Held Infants must be accompanied by a supervising companion.

Braced arm casts, full leg casts, cervical collars or neck braces, or broken collar bones are not permitted.
**Rider Access:** Access is available via the stairs or pool lift. Guests will have to transfer to the stairs, lift, or tube, on their own or with the assistance of a companion. Please speak to a member of our Aquatics supervisory team to obtain access to the pool lift.

**Crosscurrent**

Participants must be 48 inches tall to participate. Maximum weight limit of 300 pounds per tube.

Two single rider partially enclosed serpentine tube slides ending in a 42 inch deep pool. One single rider straightaway humpbacked tube slide ending in a 42 inch deep pool.

**Rider Criteria:** Riders are required to maintain the proper riding position – sitting face forward in a tube, holding onto tube handles with legs extended forward.

Guests must have a minimum of three functioning extremities.

Forearm casts, full arm casts, braced arm casts, foot or lower leg casts, full leg casts, cervical collars or neck braces, or broken collar bones are not permitted.

**Rider Access:** Access to the attraction requires climbing several flights of stairs with a tube. Guests will have to ascend the slide tower and be capable of safely entering the tube, on their own or with the assistance of a companion.

Please use caution when entering and exiting as the tube may shift. The tube and surrounding area may also be slippery.

**Great Lakes Cove/Lilly Pad Walk**

All participants less than 52 inches tall must wear a life vest. Participants less than 46 inches tall must be accompanied by a supervising companion. At this attraction, a supervising companion may accompany up to two children.

An interactive pool with floatables and a Lilly Pad Walk. Maximum water depth is 48” deep.

**Rider Criteria:** Hand Held Infants must be accompanied by a supervising companion.

Braced arm casts, full leg casts, foot or lower leg casts, cervical collars or neck braces, or broken collar bones are not permitted. Participation may be restricted for guests with full arm casts.

**Rider Access:** Access is available via the stairs or pool lift. Guests will have to transfer to the stairs, lift, or tube, on their own or with the assistance of a companion. Please speak to a member of our Aquatics supervisory team to obtain access to the pool lift.

**Lake Erie Nor’easter**

Participants must be 48 inches tall to participate. Maximum weight limit 300 pounds per tube.

Three single rider completely enclosed serpentine tube slides ending in a 42” splash pool.

**Rider Criteria:** Riders are required to maintain the proper riding position – sitting face forward in a tube, holding onto tube handles with legs extended forward.

Guests must have a minimum of three functioning extremities.

Forearm casts, full arm casts, braced arm casts, foot or lower leg casts, full leg casts, cervical collars or neck braces, or broken collar bones are not permitted.

**Rider Access:** Access to the attraction requires climbing several flights of stairs with a tube. Guests will have to ascend the slide tower and be capable of safely entering the tube, on their own or with the assistance of a companion.

Please use caution when entering and exiting as the tube may shift. The tube and surrounding area may also be slippery.
Lakeslide Landing

Participants must be 36” tall in order to ride the slides. Participants under 36” tall including hand held infants may participate in the pool if accompanied by a supervising companion. Lakeside has a maximum weight limit of 200 pounds.

An interactive water playground with slides and mini water thrills. Maximum water depth is 24” deep.

Rider Criteria: Riders are required to maintain the proper riding position – arms crossed over their chest, legs crossed at the ankles, and back flat against the slide.

Guests must have a minimum of two functioning extremities; sufficient upper extremities to maintain the proper riding position and one functioning leg.

Forearm casts, full arm casts, braced arm casts, foot or lower leg casts, full leg casts, cervical collars or neck braces, or broken collar bones are not permitted.

Lemmy’s Lagoon

Participants must be under 54 inches tall to participate. Participants over 54 inches tall must be accompanied by a child in order to participate.

A zero-depth interactive water playground featuring slides and water features.

Rider Criteria: Riders unable to maintain seated postural control, have the ability to safely enter and exit the attraction or demonstrate appropriate observed behavior must be accompanied by a supervising companion.

Braced arm casts, full leg casts, cervical collars or neck braces, or broken collar bones are not permitted.

Muffleheads Beach Bar

A 21 years old and over adult pool and bar. ID required for entry. Water depth is zero to 42”.

Rider Criteria: Braced arm casts, full leg casts, cervical collars or neck braces, or broken collar bones are not permitted.

Rider Access: Access is available via the zero depth entry. This attraction is wheelchair accessible, although the water level may not exceed the height of the seat on the chair. A water wheelchair is available for guests requiring additional assistance. Please speak to a member of our Aquatics supervisory team to obtain access to the water wheelchair.

Perch Plunge

Participants must be at least 48 inches tall to participate. Maximum weight limit 300 pounds per rider.

Three single rider partially enclosed serpentine body slides ending in a 42” splash pool.

Rider Criteria: Riders are required to maintain the proper riding position – arms crossed over their chest, legs crossed at the ankles, and back flat against the slide.

Guests must have a minimum of three functioning extremities.

Forearm casts, full arm casts, braced arm casts, foot or lower leg casts, full leg casts, cervical collars or neck braces, or broken collar bones are not permitted.
**Rider Access:** Access to the attraction requires climbing several flights of stairs. Guests will have to ascend the slide tower and be capable of safely entering the slide, on their own or with the assistance of a companion.

**Point Plummet**

Participants must be at least 48 inches tall to participate. Maximum weight limit 300 pounds per rider.

Plummet down a near-vertical free fall after the floor drops out from underneath your feet on these four massive six-story aqua-drop body slides.

**Rider Criteria:** Riders are required to maintain the proper riding position – arms crossed over their chest, legs crossed at the ankles, and back flat against the slide.

Guests must have four functioning extremities.

Forearm casts, full arm casts, braced arm casts, foot or lower leg casts, full leg casts, cervical collars or neck braces, or broken collar bones are not permitted.

**Rider Access:** Access to the attraction requires climbing several flights of stairs. Guests will have to ascend the slide tower and be capable of safely entering the slide, on their own or with the assistance of a companion.

Please use caution when entering and exiting as the tube may shift. The tube and surrounding area may also be slippery.

**Portside Plunge**

Participants must be at least 48 inches tall to participate. Maximum weight limit 300 pounds per rider.

Two single rider partially enclosed serpentine tube slides ending in a 42 inch deep pool.

**Rider Criteria:** Riders are required to maintain the proper riding position – sitting face forward in a tube, holding onto tube handles with legs extended forward.

Guests must have a minimum of three functioning extremities.

Forearm casts, full arm casts, braced arm casts, foot or lower leg casts, full leg casts, cervical collars or neck braces, or broken collar bones are not permitted.

**Rider Access:** Access to the attraction requires climbing several flights of stairs with a tube. Guests will have to ascend the slide tower and be capable of safely entering the tube, on their own or with the assistance of a companion.

**Riptide Raceway**

Participants must be at least 42 inches tall to participate. Maximum weight limit 300 pounds per rider.

A 44 foot tall complex of six separate slides which start in tunnels and end on a run-out.

**Rider Criteria:** Riders are required to maintain the proper riding position – stomach flat on a mat, head first, and holding on to handles at all times.

Guests must have a minimum of three functioning extremities; two functioning arms and one functioning leg.

Forearm casts, full arm casts, braced arm casts, foot or lower leg casts, full leg casts, cervical collars or neck braces, or broken collar bones are not permitted.

**Rider Access:** Access to the attraction requires climbing several flights of stairs with a mat. Guests will have to ascend the slide tower and be capable of safely entering the mat, on their own or with the assistance of a companion.
Please use caution when entering and exiting as the mat may shift. The mat and surrounding area may also be slippery.

**Runaway Rapids**

Persons less than 48 inches tall must wear a life vest. Persons less than 42 inches tall must also be accompanied by a supervising companion. At this attraction, a supervising companion may accompany up to two children.

1,200 foot activity flume which is 30 inches deep with many tipping buckets, waterfalls, waves, and geysers.

**Rider Criteria:** Participants may float freely, with or without a tube, in the direction of the current.

Guests must have a minimum of one functioning arm and one functioning leg, or be accompanied by a supervising companion. Hand Held Infants may not participate.

Braced arm casts, full leg casts, cervical collars or neck braces, or broken collar bones are not permitted.

**Rider Access:** Access is available via the stairs or pool lift. Guests will have to transfer to the stairs, lift, or tube, on their own or with the assistance of a companion. Please speak to a member of our Aquatics supervisory team to obtain access to the pool lift.

**SplasH2O**

Some slides have varied height requirements. Slide height requirements are either 36” or 40” depending on the height of the slide. Maximum weight limit 300 pounds per rider.

Interactive play structure with various play elements including a giant tipping bucket, sprayers, tipping pails, net crawls, rope bridges, and seven body slides. Pool depth is between 0” – 6” deep.

**Storm Surge**

Participants must be at least 46 inches tall to participate. Maximum weight limit 1,000 pounds per raft. Maximum of 4 riders per raft.

Family tube slide with high-banked turns, sudden drops, and a winding twisting pathway ending in a 24” deep pool.

**Rider Criteria:** Riders must cross their legs with their back against the tube, holding on to the handles at all times. All riders must be evenly distributed throughout the raft.

Guests must have a minimum of three functioning extremities.

Forearm casts, full arm casts, braced arm casts, foot or lower leg casts, full leg casts, cervical collars or neck braces, or broken collar bones are not permitted.

**Rider Access:** Access to the attraction requires climbing several flights of stairs. Guests will have to ascend the slide tower and be capable of safely entering the raft, on their own or with the assistance of a companion.

Please use caution when entering and exiting as the raft may shift. The raft and surrounding area may also be slippery.
**Waterin’ Hole**

Participants must be under 52 inches tall to participate. Participants over 52 inches tall must be accompanied by a child in order to participate.

An interactive water playground for children with slides and play elements. Maximum water depth is 15" deep.

**Rider Criteria:** Riders are required to maintain the proper riding position – arms locked behind head, legs crossed at the ankles, and back flat against the slide. Hand Held Infants must be accompanied by a supervising companion.

Forearm casts, full arm casts, braced arm casts, foot or lower leg casts, full leg casts, cervical collars or neck braces, or broken collar bones are not permitted on slides. Guests with cervical collars or neck braces, or broken collar bones are not permitted on elevated play structures.

**Rider Access:** Access is available via the zero depth entry. This attraction is wheelchair accessible, although the water level may not exceed the height of the seat on the chair. A water wheelchair is available for guests requiring additional assistance. Please speak to a member of our Aquatics supervisory team to obtain access to the water wheelchair.

---

**Wild Walleye**

Participants must be at least 48 inches tall. Maximum weight limit 300 pounds per tube.

Two single rider serpentine tube slides ending in a 42" deep pool.

**Rider Criteria:** Riders are required to maintain the proper riding position – sitting face forward in a tube, holding onto tube handles with legs extended forward.

Guests must have a minimum of three functioning extremities.

Forearm casts, full arm casts, braced arm casts, foot or lower leg casts, full leg casts, cervical collars or neck braces, or broken collar bones are not permitted.

**Rider Access:** Access to the attraction requires climbing several flights of stairs with a tube. Guests will have to ascend the slide tower and be capable of safely entering the tube, on their own or with the assistance of a companion.

Please use caution when entering and exiting as the tube may shift. The tube and surrounding area may also be slippery.
